Independent auditor's report

To the Shareholders and Board of Directors of Samruk-Energy JSC

Our opinion

In our opinion, the consolidated financial statements present fairly, in all material respects, the consolidated financial position of Samruk-Energy JSC (the "Company") and its subsidiaries (together - the "Group") as at 31 December 2020 and its consolidated financial performance and its consolidated cash flows for the year then ended in accordance with International Financial Reporting Standards (IFRS).

What we have audited

The Group's consolidated financial statements comprise:

- the consolidated statement of financial position as at 31 December 2020;
- the consolidated statement of profit or loss and other comprehensive income for the year then ended;
- the consolidated statement of changes in equity for the year then ended;
- the consolidated statement of cash flows for the year then ended; and
- the notes to the consolidated financial statements, which include significant accounting policies and other explanatory information.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the *Auditor's responsibilities for the audit of the consolidated financial statements* section of our report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Independence

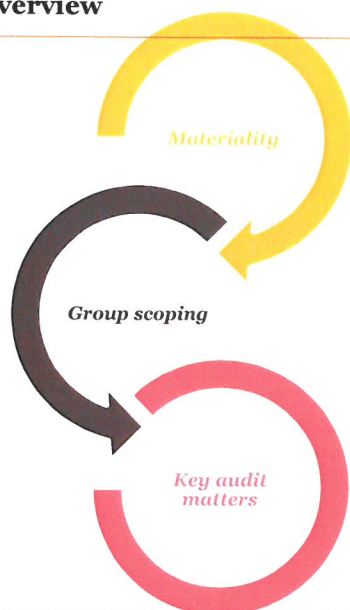

We are independent of the Group in accordance with the International Ethics Standards Board for Accountants' Code of Ethics for Professional Accountants (IESBA Code). We have fulfilled our other ethical responsibilities in accordance with the IESBA Code.

INDEPENDENT AUDITOR'S REPORT (Continued)

Page 2

Our audit approach

Overview

- Overall Group materiality: 2,550,000 thousand Tenge, which represents 0.9 % of the Group's revenue for the year ended 31 December 2020.
- We conducted audit procedures over the Company, its 5 subsidiaries and 2 jointly controlled entities located across Kazakhstan.
- Our audit scope addressed 94% of total assets, 96% of total revenue and 93% of absolute value of net profit of the Group.
- Impairment of property, plant and equipment and intangible assets;
- Impairment of investment in "Station Ekibastuz GRES-2" JSC ("SEGRES-2");

As part of designing our audit, we determined materiality and assessed the risks of material misstatement in the consolidated financial statements. In particular, we considered where management made subjective judgements; for example, in respect of significant accounting estimates that involved making assumptions and considering future events that are inherently uncertain. As in all of our audits, we also addressed the risk of management override of internal controls, including among other matters, consideration of whether there was evidence of bias that represented a risk of material misstatement due to fraud.

INDEPENDENT AUDITOR'S REPORT (Continued)

Page 3

Materiality

The scope of our audit was influenced by our application of materiality. An audit is designed to obtain reasonable assurance whether the consolidated financial statements are free from material misstatement. Misstatements may arise due to fraud or error. They are considered material if individually or in aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of the consolidated financial statements.

Based on our professional judgement, we determined certain quantitative thresholds for materiality, including the overall group materiality for the consolidated financial statements as a whole as set out in the table below. These, together with qualitative considerations, helped us to determine the scope of our audit and the nature, timing and extent of our audit procedures and to evaluate the effect of misstatements, both individually and in aggregate on the financial statements as a whole.

<i>Overall group materiality</i>	2,550,000 thousand Tenge for 2020
<i>How we determined it</i>	0.9 % of total revenue
<i>Rationale for the materiality benchmark applied</i>	<p>We chose revenue as the benchmark for materiality determination. We did not use profit before tax due to its fluctuation. Instead, we used revenue, which is less volatile and is also used by the Shareholder to assess the Group's performance. We believe that revenue aligns with the principal considerations of the users of consolidated financial statement.</p> <p>We determined materiality as 0.9 % of total revenue, which is, based on our professional judgment, within the range of acceptable quantitative materiality thresholds.</p>

INDEPENDENT AUDITOR'S REPORT (Continued)

Page 4

Key audit matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the consolidated financial statements of the current period. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Key audit matter

Audit procedures performed in relation to key audit matters

Impairment of property, plant and equipment and intangible assets

See Note 4 of the consolidated financial statements.

As of 31 December 2020, management of the Group performed impairment indicator analysis of property, plant and equipment and intangible assets. Based on the analysis management of the Group has not identified any indicators of impairment for power generating and transmission companies. However, the change in price for commodities is the indicator of possible impairment of property, plant and equipment and intangible assets of Tegis Munay LLP, which is engaged in exploration and production of gas.

We paid special attention to the issue of impairment of property, plant and equipment and intangible assets due to significance of their carrying value, as well as due to the fact that process of assessing by management impairment indicators and estimating values in use of property, plant and equipment and intangible assets is complex as it is based on the use of significant estimates and judgments with respect to future market and economic conditions and the results of operations of the Group.

The Group performed impairment indicator analysis of property, plant and equipment and intangible assets of Ekibastuz GRES-1 named after Bulat Nurzhanov LLP ("EGRES-1"), Alatau Zharyk Company JSC and Almaty Power Stations JSC ("ALES") and performed impairment test of property, plant and equipment of Tegis Munay LLP.

Our procedures in respect of management's assessment of the impairment indicators of property, plant and equipment and intangible assets included:

- understanding has been obtained of a new methodology for determining the fixed profit accounted for in power energy tariff and checking the calculation of tariff by management based on the new methodology;
- verification of accuracy and relevance of key assumptions used by management to perform the impairment indicator analysis;
- consideration of economic and market trends in the energy sector.

In addition for ALES we performed the following procedure:

- understanding has been obtained of the draft amendments to the Law of the Republic of Kazakhstan "On Power Energy", which will provide the Group with a return on investment for the modernization of Almaty CHP-2 through the mechanism of the electrical power market. We made inquiry with the management and got the understanding that the draft amendments were approved by the Government of the RK and will be submitted to the Mazhilis of the Parliament of

INDEPENDENT AUDITOR'S REPORT (Continued)

Page 5

<i>Key audit matter</i>	<i>Audit procedures performed in relation to key audit matters</i>
	<p>the RK for consideration.</p> <p>We received, inspected and evaluated the model used by management's experts to assess the impairment of assets and assessed the methodology and the main assumptions used in the model, and their consistency with the budgets and business plans, external information and our expertise, taking into account the specifics of the industry. We engaged our valuation experts to form our conclusion in relation to the assumptions and methodology used for impairment assessment.</p> <p>Our procedures in respect of management's assessment of the impairment of property, plant and equipment and intangible assets included:</p> <ul style="list-style-type: none"> • assessment of competence, qualifications, experience and objectivity of independent experts, involved by management; • analysis of determining identifiable groups of assets that generate cash inflows independently from the cash flows generated by other assets; • verification of accuracy and relevance of key assumptions used by management to perform the test; • consideration of other input data for the models and reconciliation of them with supporting documents, such as the Development plan and comparison of the Development plan with actual results, where relevant; • making a series of inquiries with management to assess the impairment tests; • comparison of actual performance for the year against prior year forecast; • consideration of the potential impact of reasonably possible changes in key assumptions. <p>Also, we paid attention to the adequacy of disclosures in Note 4 to the consolidated financial statements in accordance with the requirements of IAS 36 "Impairment of Assets".</p>

INDEPENDENT AUDITOR'S REPORT (Continued)

Page 6

Key audit matter

Audit procedures performed in relation to key audit matters

Impairment of investment in SEGRES-2

See Notes 4 of the consolidated financial statements.

Based on the analysis of impairment indicators as of December 31, 2020, the Group's management concluded that changes in the legislation, which regulates tariffs, as well as the uncertainty related with both the completion of the construction of power unit №3 and further sales of electricity that will be generated by power unit №3 are the indicators of possible impairment of non-financial assets.

As of 31 December 2020, the carrying value of the Group's investment in SEGRES-2 amounts to Tenge 15,934,313 thousand.

We paid special attention to the issue of impairment of the investment due to significance of its carrying value and the complexity of the process of evaluating its recoverable value.

We have reviewed the working papers of the component auditor and discussed the key assumptions and the methodology used in the impairment test models on property, plant and equipment of SEGRES-2, made by management of SEGRES-2. We assessed whether key assumptions are in line with our understanding of SEGRES-2 operations.

We also discussed with management of the Group and the Audit Committee plans in respect of this investment.

Also, we paid attention to the adequacy of disclosures in Note 4 to the consolidated financial statements in accordance with the requirements of IAS 36 "Impairment of Assets".

How we tailored our group audit scope

We tailored the scope of our audit in order to perform sufficient work to enable us to provide an opinion on the consolidated financial statements as a whole, taking into account the structure of the Group, the accounting processes and controls, and the industry in which the Group operates.

In establishing the overall approach to the group audit, we determined the type of work that needed to be performed by us, as the group engagement team, or component auditors, including other audit firms operating under our instructions. Where the work was performed by component auditors, we determined the level of involvement we needed to have in the audit work at those components to be able to conclude whether sufficient appropriate audit evidence had been obtained as a basis for our opinion on the Group consolidated financial statements as a whole.

The assets and operations of the Group are spread amongst 21 subjects (components), including associated companies and jointly controlled entities. Out of these, we have identified 8 components as material components, including the Company, its 5 subsidiaries and 2 jointly controlled entities.

For 7 material components we or other independent auditors, carried out a full scope audit of the financial information of the components, which the Group uses for the preparation of the consolidated financial statements. We have reviewed the working documents of other independent auditors, and discussed with them the key assumptions and methodology, received independence and compliance with IESBA Code requirements confirmations. We also discussed the key audit matters with management and the Audit Committee.

INDEPENDENT AUDITOR'S REPORT (Continued)

Page 7

We have identified other companies of the Group as not material components, for which we carried out audit procedures for the most material line items of the financial information and general analytical procedures.

In general, the scope of our audit covered 94% of total assets, 96% of total revenue and 93% of the absolute value of net profit of the Group. The procedures performed have enabled us to obtain sufficient appropriate audit evidence in relation to the consolidated financial statements of the Group and provide a basis for our audit opinion on it.

Other information

Management is responsible for the other information. The other information comprises annual report but does not include the consolidated financial statements and our auditor's report thereon. The annual report is expected to be made available to us after our audit report date.

Our opinion on the consolidated financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the consolidated financial statements, our responsibility is to read the other information identified above when it becomes available and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

When we read the other information identified above, if we conclude that there is a material misstatement therein, we are required to communicate the matter to those charged with governance.

INDEPENDENT AUDITOR'S REPORT (Continued)

Page 8

Responsibilities of management and those charged with governance for the consolidated financial statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with International Financial Reporting Standards, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Group's financial reporting process.

Auditor's responsibilities for the audit of the consolidated financial statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

INDEPENDENT AUDITOR'S REPORT (Continued)

Page 9

- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the Group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Proceeds from sale of subsidiaries, excluding cash and cash equivalents transferred	2,259,088	2,085,454
Proceeds from sale of property, plant and equipment	16,695	47,012
Decrease in bank deposits and cash with a restriction in the use of the balance of bank deposits, net	2,249,766	13,184,771
Collection of receivables / (conversion of current deposits to financial receivables) - Tauba Invest LLP (Note 14)	222,961	1,516,580
Other proceeds	147,539	761,413
Net cash used in investing activities	(43,296,625)	(10,972,574)
Cash flows from financing activities		
Proceeds from borrowings	83,996,315	167,982,854
Repayment of borrowings and payment of principal on bonds	(97,142,953)	(212,412,073)
Payment of principal on financial lease	(807,746)	(783,438)
Dividends paid to shareholders	(3,066,231)	(2,041,000)
Dividends paid to non-controlling interest holders	(754,700)	(200,476)
Other payments attributable to the Shareholder	-	(24,257)
Other payments	(30,557)	(1,542,138)
Net cash used in financing activities	(17,805,872)	(49,020,528)
Foreign exchange effect on cash and cash equivalents	593,895	(312,847)
Less provision for cash impairment under IFRS 9	1,602	87
Net decrease in cash and cash equivalents	(2,113,159)	(1,617,128)
Cash and cash equivalents at the beginning of the year	12,007,037	13,624,165
Cash and cash equivalents at the end of the year	9,893,878	12,007,037

The accompanying notes on pages 6 to 76 are an integral part of these consolidated financial statements.

1 Samruk-Energy Group and Its Operations

These consolidated financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") for the year ended 31 December 2020 for Samruk-Energy JSC (the "Company") and its subsidiaries (together referred to as the "Group").

The Company was incorporated on 18 April 2007 and registered on 10 May 2007. The Company is a joint stock company and was set up in accordance with regulations of the Republic of Kazakhstan. The Group was established for the purpose of consolidation of entities in energy industry of the Republic of Kazakhstan ("RoK").

As at 31 December 2020 the Company's sole shareholder is Samruk-Kazyna National Welfare Fund JSC ("Samruk-Kazyna"). The Company's ultimate controlling party is the Government of the RoK.

Principal activity

The Group's principal activities are production of electricity, heating energy, hot water on the basis of coal, hydrocarbons and water resources, and renewable energy sources ("RES"), and sale to households and industrial enterprises, transmission of electricity and technical distribution of electricity within the network, as well as leasing of property of hydro power plants.

The operations of the Group's subsidiaries and joint ventures are regulated by the Law of the Republic of Kazakhstan *On Electric Power Industry*, the Law *On Natural Monopolies and Regulated Markets*, the Law *On Competition*. Tariffs, based on the type of activities of a company, are regulated by the Committee on Regulation of Natural Monopolies and Protection of Competition of the Ministry of National Economy of the Republic of Kazakhstan ("Committee") or by the relevant ministry – Ministry of Energy of the Republic of Kazakhstan ("ME").

Electricity tariffs for energy producers are approved by order of the Minister of Energy No.160 *On Approval of Cap Tariffs for Electricity* dated 27 February 2015 and subsequent amendments and addendum. Tariffs for supply of electricity produced by renewable energy sources are fixed and approved by the Decree of the Government of the Republic of Kazakhstan, according to the Renewable Energy technology used (separately for wind, solar and other sources), and are subject to annual indexation. In addition, the financial centre acts as a buyer, and the power producer acts as a seller. Tariffs for electric power transmission and distribution, heating energy production and power supply ("PSE") are regulated by the Committee on Regulation of Natural Monopolies and Competition Protection of the Ministry of National Economy. Regulation and control are performed in accordance with the legislation.

The tariff related decisions are significantly exposed to social and political issues. Economic, social and other policies of the Government of the Republic of Kazakhstan may have a significant effect on the Group's operations.

Registered address and place of business

The registered address and place of Company's Head Office is: Block B, 15A, Kabanbay Batyr Avenue, Nur-Sultan, Republic of Kazakhstan.

2 Basis of Preparation and Significant Accounting Policies

Basis of preparation

These consolidated financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") under the historical cost convention. The principal accounting policies applied in the preparation of these consolidated financial statements are set out below. These policies have been consistently applied to all the periods presented, unless otherwise stated (Note 5).

The preparation of consolidated financial statements in conformity with IFRS requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the Group's accounting policies. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the consolidated financial statements are disclosed in Note 4.

Going concern

Management prepared these consolidated financial statements on a going concern basis. Management decision is based on the financial position of the Group, its current intentions, profitability of operations and access to financial resources and Government support. As of 31 December 2020, the Group's current liabilities exceed its current assets by Tenge 24,525,175 thousand (2019: the Group's current liabilities exceeded its current assets by Tenge 30,717,385 thousand). The main factor in increasing current liabilities was the attraction of short-term bank loans, associated with the Group's policy to reduce the level of long-term loans with a higher interest rate. In addition, in the reporting period, the Group made early repayments on long-term loans.

2 Basis of Preparation and Significant Accounting Policies (continued)

The following factors were considered in assessing the Group's ability to continue in the foreseeable future:

- The Group is of strategic importance for ensuring the reliability of the Kazakhstan energy system. The management and shareholders of the Group have neither the intention nor the need to dissolve the Group.
- The Group's current liabilities of Tenge 5,841,514 thousand represent payable to the Akimat of Almaty city and, by agreement, do not require cash outflows.
- In 2021, the Group expects positive cash flows from operating activities less outflow to capital costs in the amount of more than Tenge 41 billion.
- As of 31 December 2020, the Group has available funds on revolving credit facilities in Halyk Bank of Kazakhstan JSC for a total amount of more than Tenge 50 billion and in SB Sberbank JSC totaling Tenge 14 billion.

These consolidated financial statements do not include any adjustments to the carrying amount of assets and liabilities, income and expenses, or classification of the consolidated statement of financial position that would be necessary if it was not possible to continue operations, such adjustments may be significant.

Consolidated financial statements

(i) Subsidiaries

Subsidiaries are those investees, including structured entities, that the Group controls because the Group (i) has power to direct relevant activities of the investees that significantly affect their returns, (ii) has exposure, or rights, to variable returns from its involvement with the investees, and (iii) has the ability to use its power over the investees to affect the amount of investor's returns. The existence and effect of existing rights, including existing potential voting rights, are considered when assessing whether the Group has power over another entity. For a right to be existing, the holder must have practical ability to exercise that right when decisions about the direction of the relevant activities of the investee need to be made. The Group may have power over an investee even when it holds less than majority of voting power in an investee. In such a case, the Group assesses the size of its voting rights relative to the size and dispersion of holdings of the other vote holders to determine if it has de-facto power over the investee. Protective rights of other investors, such as those that relate to fundamental changes of investee's activities or apply only in exceptional circumstances, do not prevent the Group from controlling an investee.

Subsidiaries are consolidated from the date on which control is transferred to the Company (acquisition date) and are de-consolidated from the date that control ceases.

The acquisition method of accounting is used to account for the acquisition of subsidiaries. Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are measured at their fair values at the acquisition date, irrespective of the extent of any non-controlling interest.

The Group measures non-controlling interest that represents present ownership interest and entitles the holder to a proportionate share of net assets in the event of liquidation on a transaction by transaction basis, either at: (a) fair value, or (b) the non-controlling interest's proportionate share of net assets of the acquiree.

Non-controlling interests that are not present ownership interests are measured at fair value.

Goodwill is measured by deducting the net assets of the acquiree from the aggregate of the consideration transferred for the acquiree, the amount of non-controlling interest in the acquiree and fair value of an interest in the acquiree held immediately before the acquisition date. Any negative amount ("negative goodwill") is recognised in profit or loss, after management reassesses whether it identified all the assets acquired and all liabilities and contingent liabilities assumed and reviews appropriateness of their measurement.

The consideration transferred for the acquiree is measured at the fair value of the assets given up, equity instruments issued, and liabilities incurred or assumed, including the fair value of assets or liabilities from contingent consideration arrangements, but excludes acquisition related costs such as advisory, legal, valuation and similar professional services. Transaction costs related to the acquisition of and incurred for issuing equity instruments are deducted from equity; transaction costs incurred for issuing debt as part of the business combination are deducted from the carrying amount of the debt and all other transaction costs associated with the acquisition are expensed.

Intercompany transactions, balances and unrealised gains on transactions between group companies are eliminated. Unrealised losses are also eliminated unless the cost cannot be recovered. The Company and all of its subsidiaries use uniform accounting policies consistent with the Group's policies.

2 Basis of Preparation and Significant Accounting Policies (continued)

Non-controlling interest is that part of the net results and of the equity of a subsidiary attributable to interests which are not owned, directly or indirectly, by the Company. Non-controlling interest forms a separate component of the Group's equity.

(ii) Purchases of subsidiaries from parties under common control

Purchases of subsidiaries from parties under common control are accounted for using the predecessor values method. Under this method the consolidated financial statements of the combined entity are presented as if the businesses had been combined from the beginning of the earliest period presented or, if later, the date when the combining entities were first brought under common control. The assets and liabilities of the subsidiary transferred under common control are at the predecessor entity's carrying amounts. The predecessor entity is considered to be the highest reporting entity in which the subsidiary's IFRS financial information was consolidated. Related goodwill inherent in the predecessor entity's original acquisitions is also recorded in these consolidated financial statements. Any difference between the carrying amount of net assets, including the predecessor entity's goodwill, and the consideration for the acquisition is accounted for in these consolidated financial statements as an adjustment to other reserves within equity.

(iii) Purchases and sales of non-controlling interests

The Group applies the economic entity model to account for transactions with owners of non-controlling interest in transactions that do not result in a loss of control. Any difference between the purchase consideration and the carrying amount of non-controlling interest acquired is recorded as a capital transaction directly in equity. The Group recognises the difference between sales consideration and the carrying amount of non-controlling interest sold as a capital transaction in the statement of changes in equity.

(iv) Joint arrangements

Under IFRS 11 investments in joint arrangements are classified as either joint operations or joint ventures depending on the contractual rights and obligations of each investor. The Group has assessed the nature of its joint arrangements and determined them to be joint ventures. Joint ventures are accounted for using the equity method.

Under the equity method of accounting, interests in joint ventures are initially recognised at cost and adjusted thereafter to recognise the Group's share of the post-acquisition profits or losses and movements in other comprehensive income.

When the Group's share of losses in a joint venture equals or exceeds its interests in the joint ventures (which includes any long-term interests that, in substance, form part of the Group's net investment in the joint ventures), the Group does not recognise further losses, unless it has incurred obligations or made payments on behalf of the joint ventures.

Unrealised gains on transactions between the Group and its joint ventures are eliminated to the extent of the Group's interest in the joint ventures. Unrealised losses are also eliminated unless the transaction provides evidence of an impairment of the asset transferred. Accounting policies of the joint ventures have been changed where necessary to ensure consistency with the policies adopted by the Group.

(v) Investments in associates

Associates are entities over which the Group has significant influence (directly or indirectly), but not control, generally accompanying a shareholding of between 20 and 50 percent of the voting rights. Investments in associates are accounted for using the equity method of accounting and are initially recognised at cost, and the carrying amount is increased or decreased to recognise the investor's share of the profit or loss of the investee after the date of acquisition. Dividends received from associates reduce the carrying value of the investment in associates. Other post-acquisition changes in the Group's share of net assets of an associate are recognised as follows: (i) the Group's share of profits or losses of associates is recorded in the consolidated profit or loss for the year as the share of results of associates, (ii) the Group's share of other comprehensive income is recognised in other comprehensive income and presented separately, (iii); all other changes in the Group's share of the carrying value of net assets of associates are recognised in profit or loss within the share of results of associates.

However, when the Group's share of losses in an associate equal or exceeds its interest in the associate, including any other unsecured receivables, the Group does not recognise further losses, unless it has incurred obligations or made payments on behalf of the associate.

Unrealised gains on transactions between the Group and its associates are eliminated to the extent of the Group's interest in the associates; unrealised losses are also eliminated unless the transaction provides evidence of an impairment of the asset transferred.

2 Basis of Preparation and Significant Accounting Policies (continued)

(vi) Disposals of subsidiaries, associates or joint ventures

When the Group ceases to have control or significant influence, any retained interest in the entity is remeasured to its fair value at the date when control is lost, with the change in carrying amount recognised in profit or loss. The fair value is the initial carrying amount for the purposes of subsequently accounting for the retained interest as an associate, joint venture or financial asset. In addition, any amounts previously recognised in other comprehensive income in respect of that entity, are accounted for as if the Group had directly disposed of the related assets or liabilities. This may mean that amounts previously recognised in other comprehensive income are reclassified to profit or loss.

If the ownership interest in an associate is reduced but significant influence is retained, only a proportionate share of the amounts previously recognised in other comprehensive income are reclassified to profit or loss where appropriate.

Foreign currency translation

(i) Functional and presentation currency

All amounts in these consolidated financial statements are presented in thousands Tenge, unless otherwise stated.

Functional currency is the currency of the primary economic environment in which the entity operates. The functional currency of subsidiaries, joint ventures, associates and the parent is Tenge.

(ii) Transactions and balances in foreign currency

Foreign currency transactions are translated into the functional currency using the exchange rate prevailing at the dates of transactions.

Foreign exchange gains and losses resulting from the settlement of such transactions or from the translation at year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in profit or loss.

At 31 December 2020, the principal rate of exchange used for translating foreign currency balances was US Dollar per Tenge 420.91 (31 December 2019: US Dollar per Tenge 381.18). Exchange restrictions and currency controls exist relating to converting the Tenge into other currencies. Currently, Tenge is not freely convertible in most countries outside of the Republic of Kazakhstan.

Financial instruments

(i) Key measurement terms

Depending on their classification financial instruments are carried at fair value, cost or amortised cost as described below.

Fair value is price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The best evidence of fair value is price in an active market. An active market is one in which transactions for the asset or liability take place with sufficient frequency and volume to provide pricing information on an ongoing basis.

Fair value of financial instruments traded in an active market is measured as the product of the quoted price for the individual asset or liability and the number of instruments held by the entity. This is the case even if a market's normal daily trading volume is not sufficient to absorb the quantity held and placing orders to sell the position in a single transaction might affect the quoted price.

Valuation techniques such as discounted cash flow models or models based on recent arm's length transactions or consideration of financial data of the investees are used to measure fair value of certain financial instruments for which external market pricing information is not available.

Fair value measurements are analysed by level in the fair value hierarchy as follows: (i) level one are measurements at quoted prices (unadjusted) in active markets for identical assets or liabilities, (ii) level two measurements are valuations techniques with all material inputs observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices), and (iii) level three measurements are valuations not based on solely observable market data (that is, the measurement requires significant unobservable inputs). Transfers between levels of the fair value hierarchy are deemed to have occurred at the end of the reporting period (Note 33).

2 Basis of Preparation and Significant Accounting Policies (continued)

Cost is the amount of cash or cash equivalents paid or the fair value of the other consideration given to acquire an asset at the time of its acquisition and includes transaction costs. Measurement at cost is only applicable to investments in equity instruments that do not have a quoted market price and whose fair value cannot be reliably measured and derivatives that are linked to, and must be settled by, delivery of such unquoted equity instruments.

Transaction costs are incremental costs that are directly attributable to the acquisition, issue or disposal of a financial instrument. An incremental cost is one that would not have been incurred if the transaction had not taken place. Transaction costs include fees and commissions paid to agents (including employees acting as selling agents), advisors, brokers and dealers, levies by regulatory agencies and securities exchanges, and transfer taxes and duties.

Transaction costs do not include debt premiums or discounts, financing costs or internal administrative or holding costs.

Amortised cost ("AC") is the amount at which the financial instrument was recognised at initial recognition less any principal repayments, plus accrued interest, and for financial assets less any allowance for expected credit losses ("ECL"). Accrued interest includes amortisation of transaction costs deferred at initial recognition and of any premium or discount to the maturity amount using the effective interest method. Accrued interest income and accrued interest expense, including both accrued coupon and amortised discount or premium (including fees deferred at origination, if any), are not presented separately and are included in the carrying values of the related items in the statement of financial position.

The effective interest method is a method of allocating interest income or interest expense over the relevant period, so as to achieve a constant periodic rate of interest (effective interest rate) on the carrying amount. The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts (excluding future credit losses) through the expected life of the financial instrument or a shorter period, if appropriate, to the net carrying amount of the financial instrument. The effective interest rate discounts cash flows of variable interest instruments to the next interest repricing date, except for the premium or discount which reflects the credit spread over the floating rate specified in the instrument, or other variables that are not reset to market rates. Such premiums or discounts are amortised over the whole expected life of the instrument. The present value calculation includes all fees paid or received between parties to the contract that are an integral part of the effective interest rate.

For assets that are purchased or originated credit impaired ("POCI") at initial recognition, the effective interest rate is adjusted for credit risk, i.e. it is calculated based on the expected cash flows on initial recognition instead of contractual payments.

(ii) Financial assets

Measurement categories. The Group classifies financial assets in the following measurement categories: i) carried at fair value through profit or loss (FVTPL), ii) carried at fair value through other comprehensive income (FVOCI), iii) carried at amortised cost (AC). The classification and subsequent measurement of debt financial assets depends on: (i) the Group's business model for managing the related assets portfolio and (ii) the cash flow characteristics of the asset.

Business model

The business model reflects how the Group manages the assets in order to generate cash flows – whether the Group's objective is: (i) solely to collect the contractual cash flows from the assets ("hold to collect contractual cash flows"), or (ii) to collect both the contractual cash flows and the cash flows arising from the sale of assets ("hold to collect contractual cash flows and sell") or, if neither of (i) and (ii) is applicable, the financial assets are classified as part of "other" business model and measured at FVTPL. Business model is determined for a group of assets (on a portfolio level) based on all relevant evidence about the activities that the Group undertakes to achieve the objective set out for the portfolio available at the date of the assessment.

Cash flow characteristics

Where the business model is to hold assets to collect contractual cash flows or to hold contractual cash flows and sell, the Group assesses whether the cash flows represent solely payments of principal and interest ("SPPI"). Financial assets with embedded derivatives are considered in their entirety when determining whether their cash flows are consistent with the SPPI feature. In making this assessment, the Group considers whether the contractual cash flows are consistent with a basic lending arrangement, i.e. interest includes only consideration for credit risk, time value of money, other basic lending risks and profit margin. Where the contractual terms introduce exposure to risk or volatility that is inconsistent with a basic lending arrangement, the financial asset is classified and measured at FVTPL. The SPPI assessment is performed on initial recognition of an asset and it is not subsequently reassessed.

2 Basis of Preparation and Significant Accounting Policies (continued)

Financial assets – reclassification

Financial instruments are reclassified only when the business model for managing the portfolio as a whole changes.

The reclassification has a prospective effect and takes place from the beginning of the first reporting period that follows after the change in the business model. The Group did not change its business model during the current and comparative period and did not make any reclassifications.

Financial assets impairment – credit loss allowance for ECL

The Group assesses, on a forward-looking basis, the ECL for debt instruments measured at AC and FVOCI and for the exposures arising from loan commitments and financial guarantee contracts, for contract assets. The Group measures ECL and recognises Net impairment losses on financial and contract assets at each reporting date. The measurement of ECL reflects: (i) an unbiased and probability weighted amount that is determined by evaluating a range of possible outcomes, (ii) time value of money and (iii) all reasonable and supportable information that is available without undue cost and effort at the end of each reporting period about past events, current conditions and forecasts of future conditions.

Debt instruments measured at AC are presented in the consolidated statement of financial position net of the allowance for ECL.

The Group applies a three stage model for impairment, based on changes in credit quality since initial recognition. A financial instrument that is not credit-impaired on initial recognition is classified in Stage 1. Financial assets in Stage 1 have their ECL measured at an amount equal to the portion of lifetime ECL that results from default events possible within the next 12 months or until contractual maturity, if shorter ("12 Months ECL"). If the Group identifies a significant increase in credit risk ("SICR") since initial recognition, the asset is transferred to Stage 2 and its ECL is measured based on ECL on a lifetime basis, that is, up until contractual maturity but considering expected prepayments, if any ("Lifetime ECL"). If the Group determines that a financial asset is credit-impaired, the asset is transferred to Stage 3 and its ECL is measured as a Lifetime ECL. For financial assets that are purchased or originated credit-impaired ("POCI Assets"), the ECL is always measured as a Lifetime ECL.

Financial assets – write-off

Financial assets are written-off, in whole or in part, when the Group exhausted all practical recovery efforts and has concluded that there is no reasonable expectation of recovery. The write-off represents a derecognition event.

Financial assets – derecognition

The Group derecognises financial assets when (a) the assets are redeemed or the rights to cash flows from the assets otherwise expire or (b) the Group has transferred the rights to the cash flows from the financial assets or entered into a qualifying pass-through arrangement whilst (i) also transferring substantially all the risks and rewards of ownership of the assets or (ii) neither transferring nor retaining substantially all the risks and rewards of ownership but not retaining control. Control is retained if the counterparty does not have the practical ability to sell the asset in its entirety to an unrelated third party without needing to impose additional restrictions on the sale.

Financial assets – modification

The Group sometimes renegotiates or otherwise modifies the contractual terms of the financial assets. The Group assesses whether the modification of contractual cash flows is substantial.

If the modified terms are substantially different, the rights to cash flows from the original asset expire and the Group derecognises the original financial asset and recognises a new asset at its fair value. The date of renegotiation is considered to be the date of initial recognition for subsequent impairment calculation purposes, including determining whether a SICR has occurred. The Group also assesses whether the new loan or debt instrument meets the SPPI criterion. Any difference between the carrying amount of the original asset derecognised and fair value of the new substantially modified asset is recognised in profit or loss, unless the substance of the difference is attributed to a capital transaction with owners.

In a situation where the renegotiation was driven by financial difficulties of the counterparty and inability to make the originally agreed payments, the Group compares the original and revised expected cash flows to assets whether the risks and rewards of the asset are substantially different as a result of the contractual modification. If the risks and rewards do not change, the modified asset is not substantially different from the original asset and the modification does not result in derecognition.

2 Basis of Preparation and Significant Accounting Policies (continued)

The Group recalculates the gross carrying amount by discounting the modified contractual cash flows by the original effective interest rate (or credit-adjusted effective interest rate for POCI financial assets), and recognises a modification gain or loss in profit or loss.

(iii) Financial liabilities

Measurement categories

Financial liabilities are classified as subsequently measured at AC, except for (i) financial liabilities at FVTPL: this classification is applied to derivatives, financial liabilities held for trading (e.g. short positions in securities), contingent consideration recognised by an acquirer in a business combination and other financial liabilities designated as such at initial recognition and (ii) financial guarantee contracts and loan commitments.

Financial liabilities – derecognition

Financial liabilities are derecognised when they are extinguished (i.e. when the obligation specified in the contract is discharged, cancelled or expires).

An exchange between the Group and its original lenders of debt instruments with substantially different terms, as well as substantial modifications of the terms and conditions of existing financial liabilities, are accounted for as an extinguishment of the original financial liability and the recognition of a new financial liability. The terms are substantially different if the discounted present value of the cash flows under the new terms, including any fees paid net of any fees received and discounted using the original effective interest rate, is at least 10% different from the discounted present value of the remaining cash flows of the original financial liability. In addition, other qualitative factors are also considered. If an exchange of debt instruments or modification of terms is accounted for as an extinguishment, any costs or fees incurred are recognised as part of the gain or loss on the extinguishment. If the exchange or modification is not accounted for as an extinguishment, any costs or fees incurred adjust the carrying amount of the liability and are amortised over the remaining term of the modified liability.

Modifications of liabilities that do not result in extinguishment are accounted for as a change in estimate using a cumulative catch up method, with any gain or loss recognised in profit or loss, unless the economic substance of the difference in carrying values is attributed to a capital transaction with owners.

Financial liabilities designated at FVTPL

The Group may designate certain liabilities at FVTPL at initial recognition. Gains and losses on such liabilities are presented in profit or loss except for the amount of change in the fair value that is attributable to changes in the credit risk of that liability (determined as the amount that is not attributable to changes in market conditions that give rise to market risk), which is recorded in OCI and is not subsequently reclassified to profit or loss. This is unless such a presentation would create, or enlarge, an accounting mismatch, in which case the gains and losses attributable to changes in credit risk of the liability are also presented in profit or loss.

(iv) Offsetting

Financial assets and liabilities are offset, and the net amount reported in the statement of financial position only when there is a legally enforceable right to offset the recognised amounts, and there is an intention to either settle on a net basis, or to realise the asset and settle the liability simultaneously. Such a right of set off (a) must not be contingent on a future event and (b) must be legally enforceable in all of the following circumstances: (i) in the normal course of business, (ii) in the event of default and (iii) in the event of insolvency or bankruptcy.

Derivative financial instruments

Derivative financial instruments, including foreign exchange contracts, interest rate futures, forward rate agreements, currency and interest rate swaps, currency and interest rate options are carried at their fair value.

All derivative instruments are carried as assets when fair value is positive and as liabilities when fair value is negative. Changes in the fair value of derivative instruments are included in profit or loss for the year (income less expenses on derivative financial instruments). The Group does not apply hedge accounting.

Certain derivative instruments embedded in financial liabilities and other non-financial contracts are treated as separate derivative instruments when their risks and characteristics are not closely related to those of the host contract.

2 Basis of Preparation and Significant Accounting Policies (continued)

Property, plant and equipment

(i) Recognition and subsequent measurement

Property, plant and equipment are stated at cost less accumulated depreciation and provision for impairment, where required. Cost comprises purchase price, including import duties and non-refundable purchase taxes, after deducting trade discounts and rebates, and any costs directly attributable to bringing the asset to the location and condition necessary for its intended use. The cost of self-constructed assets includes the cost of materials, direct labour and part of production overhead costs.

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. Costs of minor repairs and day-to-day maintenance are expensed when incurred. Cost of replacing major parts or components of property, plant and equipment items are capitalised and the replaced part is retired.

Gains and losses on disposals are determined by comparing proceeds with carrying amount, and are recognised in profit or loss for the year within other income or expenses.

(ii) Depreciation

Land is not depreciated. Depreciation on other items of property, plant and equipment is calculated using the straight-line method to allocate their cost to their residual values over their estimated useful lives, as follows:

	<u>Useful lives in years</u>
Buildings and constructions	8 - 100
Machinery and equipment and vehicles	2 - 50
Other	3 - 20

The residual value of an asset is the estimated amount that the Group would currently obtain from disposal of the asset less the estimated costs of disposal, if the asset was already of the age and in the condition expected at the end of its useful life. The residual value of an asset set equal to zero, if the Group intends to use the object till the end of its physical useful life. The assets' residual values and useful lives are reviewed, and adjusted if appropriate, at the end of each reporting period.

(iii) Impairment

At the end of each reporting period, management assesses whether there is any indication of impairment of property, plant and equipment. If any such indication exists, management estimates the recoverable amount, which is determined as the higher of: an asset's fair value less costs to sell and its value in use. The carrying amount is reduced to the recoverable amount and the impairment loss is recognised in the profit or loss for the year. An impairment loss recognised for an asset in prior years is reversed if there has been a change in the estimates used to determine the asset's value in use or fair value less costs to sell.

Intangible assets

All of the Group's intangible assets have definite useful lives and primarily include capitalised computer software and licenses. Acquired computer software is capitalised on the basis of the costs incurred to acquire and bring it to use.

All intangible assets are amortised using the straight-line method over their useful lives, estimated by the management as from 2 to 25 years.

If impaired, the carrying amount of intangible assets is written down to the higher of: value in use and fair value less costs to sell.

If the Group acquires a group of assets, which is not a business, it spreads the cost of the group between the individual identifiable assets in the group based on their relative fair values at the acquisition date.

2 Basis of Preparation and Significant Accounting Policies (continued)

Intangible assets that have an indefinite useful life or intangible assets not ready for use are not subject to amortisation and are tested annually for impairment. Assets that are subject to depreciation and amortisation are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs of disposal and value in use. For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are largely independent cash inflows (cash-generating units). Prior impairments of non-financial assets (other than goodwill) are reviewed for possible reversal at each reporting date

Investment property

Investment property is property held by the Group to earn rental income or for capital appreciation and which is not occupied by the Group. Investment property includes construction in progress intended for use as investment property.

Investment properties are stated in the consolidated financial statements at cost less accumulated depreciation and provision for impairment, where required.

If any indication exists that investment properties may be impaired, the Group estimates the recoverable amount as the higher of value in use and fair value less costs to sell. The carrying amount of an investment property is written down to its recoverable amount through profit or loss for the year. An impairment loss recognised in prior years is reversed if there has been a subsequent change in the estimates used to determine the asset's recoverable amount. Subsequent expenditures are capitalised only when it is probable that future economic benefits associated with the investment property will flow to the Group and the cost can be measured reliably. All other repairs and maintenance costs are expensed when incurred.

If an investment property becomes owner-occupied, it is reclassified to property, plant and equipment, and its carrying amount at the date of reclassification becomes its deemed cost to be subsequently depreciated. Depreciation on investment property is calculated using the straight-line method to allocate its cost to its residual values over their estimated useful lives, as follows:

	<u>Useful lives in years</u>
Dam and hydraulic constructions	100
Other	5 - 20

Earned rental income is recorded in profit or loss for the year within revenue.

Right-of-use assets

The Group leases various offices, equipment and vehicles. Contracts may contain both lease and non-lease components. The Group allocates the consideration in the contract to the lease and non-lease components based on their relative stand-alone prices. However, for leases of real estate for which the Group is a lessee, it has elected not to separate lease and non-lease components and instead accounts for these as a single lease component.

Assets arising from a lease are initially measured on a present value basis.

Right-of-use assets are measured at cost comprising the following:

- the amount of the initial measurement of lease liability,
- any lease payments made at or before the commencement date less any lease incentives received,
- costs to restore the asset to the conditions required by lease agreements,
- any initial direct costs.

Right-of-use assets are generally depreciated over the shorter of the asset's useful life and the lease term on a straight-line basis. If the Group is reasonably certain to exercise a purchase option, the right-of-use asset is depreciated over the underlying assets' useful lives.

Depreciation on the items of the right-of-use assets is calculated using the straight-line method over their estimated useful lives as follows:

	<u>Useful lives in years</u>
Land	34 – 63
Buildings and constructions	5 – 50

2 Basis of Preparation and Significant Accounting Policies (continued)

Inventories

Inventories are recorded at the lower of cost and net realisable value. The cost of inventory is determined on the first-in, first-out basis. The cost of finished goods and work in progress comprises raw material, direct labour, other direct costs and related production overheads, but excludes borrowing costs.

Net realisable value is the estimated selling price in the ordinary course of business, less the estimated cost of completion and selling expenses.

Trade and other receivables

Trade and other receivables, except for prepaid taxes and advances to supplies, are initially recognised at fair value and are subsequently measured at amortised cost using the effective interest method.

Advances to suppliers are carried at cost less provision for impairment. Advances are classified as non-current when the goods or services relating to the advances are expected to be obtained after one year, or when advances relate to an asset which will itself be classified as non-current upon initial recognition. Advances to acquire assets are transferred to the carrying amount of the asset once the Group has obtained control of the asset and it is probable that future economic benefits associated with the asset will flow to the Group. Other advances are written off to profit or loss when the goods or services relating to the advances are received. If there is an indication that the assets, goods or services relating to advances will not be received, the carrying value of the advances is written down accordingly, and a corresponding impairment loss is recognised in the profit or loss for the year. Prepaid taxes are stated at actual amounts paid less impairment provision.

Cash and cash equivalents

Cash and cash equivalents include cash on hand and cash at current bank accounts. Cash and cash equivalents are carried at AC because: (i) they are held for collection of contractual cash flows and those cash flows represent SPPI, and (ii) they are not designated at FVTPL.

Restricted balances are excluded from cash and cash equivalents for the purposes of the consolidated cash flow statement.

Balances restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period are included in other non-current assets; balances restricted for more than three months but less than twelve months after the reporting period are included in other current assets.

Non-current assets held for sale (or disposal groups)

Non-current assets or disposal groups (which may include both non-current and current assets) are classified in the statement of financial position as 'non-current assets held for sale and disposal groups' if their carrying amount will be recovered principally through a sale transaction within twelve months after the reporting period. Assets are reclassified when all of the following conditions are met: (a) the assets are available for immediate sale in their present condition; (b) the Group's management approved and initiated an active programme to locate a buyer; (c) the assets are actively marketed for a sale at a reasonable price; (d) the sale is expected within one year; and (e) it is unlikely that significant changes to the plan to sell will be made or that the plan will be withdrawn.

Share capital

Ordinary shares are classified as equity. Incremental costs directly attributable to the issue of new shares are shown in equity as a deduction, net of tax, from the proceeds. The Board of Directors of the Company determines value per share and a number of shares to be issued on each individual share issue based on the statutory rules. Any excess of the fair value of consideration received over the par value of shares issued is recorded as share premium in equity.

Dividends

Dividends are recognised as a liability and deducted from equity at the end of reporting period only if they are declared and approved before or on the end of reporting period.

Dividends are disclosed when they are proposed before the reporting date or proposed or declared after the reporting date but before the financial statements are authorised for issue.

2 Basis of Preparation and Significant Accounting Policies (continued)

Value added tax

Value-added tax ("VAT") related to sales is payable to the tax authorities when goods are shipped, or services are rendered. Input VAT can be offset against output VAT upon the receipt of a tax invoice from a supplier.

Tax legislation allows the settlement of VAT on a net basis. Accordingly, VAT related to sales and purchases is stated in the statement of financial position on a net basis. Recoverable VAT is classified as non-current if its settlement is not expected within one year after the reporting period.

Provisions

Provisions are recognised when the Group has a present legal or constructive obligation as a result of past events, and it is probable that an outflow of resources will be required to settle the obligation, and a reliable estimate of the amount can be made. Provisions are not recognised for future operating losses.

Ash dump restoration provision

Ash dump restoration provision is recognised when there is a high certainty of incurring the costs and those costs can be measured reliably. Ash dump restoration costs include dismantling and demolition of ash dump infrastructure, environmental clean-up and discharge monitoring. Estimated restoration costs are added to the cost of an item of property plant and equipment when incurred in the accounting period when the obligation arising from the related disturbance occurs during the mine development phase, based on the net present value of estimated future costs. Ash dump restoration provision does not include any additional obligations which are expected to arise from future disturbance.

The costs are estimated on the basis of a restoration plan. The cost estimates are calculated annually during the operating life to reflect known developments, such as updated cost estimates and revisions to the estimated lives of operation and are subject to formal review at regular intervals.

Although the ultimate cost to be incurred is uncertain, the Group estimates the respective costs based on feasibility and engineering studies using current restoration standards and techniques for conducting works on restoration and remediation of waste polygons. The amortisation or "unwinding" of the discount applied in establishing the net present value of provisions is charged to profit and loss in each accounting period. The amortisation of the discount is shown as finance costs.

Employee benefits

(i) Long-term employee benefits

The Group companies provide the long-term employee benefits to employees before, on and after retirement, in accordance with a Collective Labour Agreement. The agreement provides for one-off retirement payments, financial aid for employees' disability, significant anniversaries and funeral aid to the Group's employees. The entitlement to some benefits is usually conditional on the employee remaining in service up to retirement age and the completion of a minimum service period.

The expected cost of these benefits is accrued over the period of employment using the same accounting methodology as used for the defined post-employment benefit plan. The Group does not have any funded pension plans. The liability recognised for the end of each reporting period represents the present value of defined benefit obligations. Actuarial gains and losses arising in the year are taken to profit or loss and other comprehensive income for the year. For this purpose, actuarial gains and losses comprise both the effects of changes in actuarial assumptions and experience adjustments arising because of differences between the previous actuarial assumptions and what has actually occurred.

Other movements in post-employment benefit obligations when incurred are accounted for as follows: (i) cost of services and net interest costs are included in profit or loss; and (ii) restatements are recorded in other comprehensive income.

The most significant assumptions used in accounting for defined benefit obligations are the discount rate and the personnel turnover assumptions. The discount rate is used to determine the net present value of future liabilities and each year the unwinding of the discount on those liabilities is charged to the profit or loss for the year as finance costs. The personnel turnover assumption is used to estimate the future stream of benefit payments, which is then discounted to arrive at a net present value of liabilities.

2 Basis of Preparation and Significant Accounting Policies (continued)

These obligations are valued annually by independent qualified actuaries.

(ii) Staff costs and related contributions

Wages, salaries, contributions to pension and social insurance funds, paid annual leave and sick leave, bonuses, and non-monetary benefits are accrued in the year in which the associated services are rendered by the employees of the Group.

On behalf of its employees, the Group withholds and transfer those statutory pension and post-employment benefit amounts prescribed by the legal requirements of the Republic of Kazakhstan to Unified Accumulative Pension Fund JSC ("Fund"). For those employees, not covered by the Collective Labour Agreement payments, upon retirement, the financial obligations of the Group cease and all subsequent payments to retired employees are administered by the Fund.

Lease liabilities

Liabilities arising from a lease are initially measured on a present value basis. Lease liabilities include the net present value of the following lease payments:

- fixed payments (including in-substance fixed payments), less any lease incentives receivable,
- variable lease payment that are based on an index or a rate, initially measured using the index or rate as at the commencement date,
- amounts expected to be payable by the Group under residual value guarantees,
- the exercise price of a purchase option if the Group is reasonably certain to exercise that option, and
- payments of penalties for terminating the lease, if the lease term reflects the Group exercising that option.

Extension and termination options are included in a number of property lease agreements across the Group. These terms are used to maximise operational flexibility in terms of managing the assets used in the Group's operations. The majority of extension and termination options held are exercisable only by the Group and not by the respective lessor. Extension options (or period after termination options) are only included in the lease term if the lease is reasonably certain to be extended (or not terminated). Lease payments to be made under reasonably certain extension options are also included in the measurement of the liability.

The lease payments are discounted using the interest rate implicit in the lease. If that rate cannot be readily determined, which is generally the case for leases of the Group, the Group's incremental borrowing rate is used, being the rate that the Group would have to pay to borrow the funds necessary to obtain an asset of similar value to the right-of-use asset in a similar economic environment with similar terms, collateral and conditions.

To determine the incremental borrowing rate, the Group:

- where possible, uses recent third-party financing received by the individual lessee as a starting point, adjusted to reflect changes in financing conditions since third party financing was received,
- uses a build-up approach that starts with a risk-free interest rate adjusted for credit risk, and
- makes adjustments specific to the lease, e.g. term, country, currency and collateral.

The Group is exposed to potential future increases in variable lease payments based on an index or rate, which are not included in the lease liability until they take effect.

When adjustments to lease payments based on an index or rate take effect, the lease liability is reassessed and adjusted against the right-of-use asset.

Lease payments are allocated between principal and finance costs. The finance costs are charged to profit or loss over the lease period so as to produce a constant periodic rate of interest on the remaining balance of the liability for each period.

Payments associated with short-term leases of equipment and vehicles and all leases of low-value assets are recognised on a straight-line basis as an expense in profit or loss. Short-term leases are leases with a lease term of 12 months or less.

2 Basis of Preparation and Significant Accounting Policies (continued)

Borrowings

Borrowings are recognised initially at fair value, net of transaction costs incurred and are subsequently carried at AC using the effective interest method.

In accounting for loans from the shareholders with off market terms, the Group records gain/(loss) on origination in equity as a capital contribution/(distribution). The method used reflects the transaction's economic substance and is applied consistently to all similar transactions and is disclosed in the consolidated financial statements.

General and specific borrowing costs directly attributable to the acquisition, construction or production of assets that necessarily take a substantial time to get ready for intended use or sale (qualifying assets) are capitalised as part of the costs of those assets.

The commencement date for capitalisation is when (a) the Group incurs expenditures for the qualifying asset; (b) it incurs borrowing costs; and (c) it undertakes activities that are necessary to prepare the asset for its intended use or sale. Capitalisation of borrowing costs continues up to the date when the assets are substantially ready for their use or sale.

The Group capitalises borrowing costs that could have been avoided if it had not made capital expenditure on qualifying assets. Borrowing costs capitalised are calculated at the Group's average funding cost (the weighted average interest cost is applied to the expenditures on the qualifying assets), except to the extent that funds are borrowed specifically for the purpose of obtaining a qualifying asset. Where this occurs, actual borrowing costs incurred on the specific borrowings less any investment income on the temporary investment of these borrowings are capitalised.

Borrowings are classified as current liabilities unless the Group has an unconditional right to defer settlement of the liability for at least twelve months after the reporting period.

Trade and other payables

Trade and other payables are accrued when the counterparty performed its obligations under the contract. Trade and other payables, except for advances received, are initially recognised at fair value and subsequently carried at amortised cost using the effective interest method. Advances received are stated at actual amounts received from the third parties.

Government grants

Grants from the government are recognised at their fair value where there is a reasonable assurance that the grant will be received, and the Group will comply with all attached conditions.

Government grants relating to costs are deferred and recognised in profit or loss for the year as other operating income over the period necessary to match them with the costs that they are intended to compensate.

Revenue recognition

Revenue is income arising in the course of the Group's ordinary activities.

Revenue is recognised in the amount of transaction price. Transaction price is the amount of consideration to which the Group expects to be entitled in exchange for transferring control over promised goods or services to a customer, excluding the amounts collected on behalf of third parties. Revenue is shown net of value-added tax and discounts. Revenue from sale of energy is recognised over the period.

Consolidated revenue of the Group is mainly attributed to sale and transmission of electric and heating power, and hot water production. Sale of each type of the goods/services is documented in a separate, identifiable contract with an individual customer.

According to the contracts for sale and transmission of electric and heating power of the Group's subsidiaries, obligations to be performed are identified when concluding the relevant contract. Contracts for sale and transmission of electric and heating power within the Group do not include related and/or additional services.

The Group does not assume concluding contracts which provide for a period between transfer of the promised goods or services to the customer and payment by the customer to be more than one year. Accordingly, the Group does not adjust transaction prices for time value for money.

2 Basis of Preparation and Significant Accounting Policies (continued)

According to the contracts for sale and transmission of electric and heating power, the contract amount is the price for sold or transmitted amount of electric or heating power, which is an independent item of the service/goods.

Electric and heating power generation and sale

Revenues are recognised based on the actual amount of electric and heating power sold by the Group's power plants.

Revenue is determined based on tariffs approved by the authorised agency.

Sales of electric and heating power are recognised when control of the power has transferred, being when the power is transmitted to the customer at the delivery point, which is a connection point of the Group's power plant to the transmission networks.

A receivable is recognised when electric and heating power is delivered at the connection point of the Group's power plant to the transmission networks, as this is the point in time that the consideration is unconditional because only the passage of time is required before the payment is due. Actual volume of electric and heating power transmitted for the accounting period is supported by the act of electric power supply/reconciliation report on heating power. Invoices are issued to customers on a monthly basis.

Electric power transmission and distribution

The Group provides services under fixed-price contracts per 1 kWh of transmitted and distributed power based on the tariffs approved by the authorised agency.

Revenue from providing services is recognised in the accounting period in which the services are rendered. Revenue is recognised based on the actual volume of electric power transmitted over the reporting period because the customer receives and uses the benefits simultaneously.

The actual volume of electric power transmitted and distributed for the reporting period is supported by relevant reconciliation reports to be monthly executed and signed with customers based on readings of metering devices. Customers are billed on a monthly basis on the last day of each month, and consideration is payable within 5 working days after billing.

A receivable is recognised when an invoice is issued, as this is the point in time that the consideration is unconditional because only the passage of time is required before the payment is due.

Revenue from services to maintain the electric power capacity

Also, the Group provides a service to maintain the electric power capacity. Revenues from the provision of services to maintain the electric power capacity are recognized in the reporting period when these services were provided. Revenue is determined on the basis of the actual electric power capacity, on the basis of monthly reports on the available electric power capacity from a single purchaser in accordance with the Rules of the power capacity market.

The contract provides for payment for 1 kW of available power per month, and revenue is recognized in the amount to which the Group has the right to invoice.

Pursuant to the certificate signed for the reporting month, the Group issues invoices to the Single Purchaser on a monthly basis.

Sale of electric power

The Group sells electric power under agreements with individuals and legal entities based on the tariffs approved by the authorised agency.

Sales to legal entities are recognised in the reporting period in which electric power is consumed, according to readings of the metering devices. A legal entity agreement requires payment within 5 working days after billing. An agreement of publicly-funded legal entities provides for payment until 15th day of the month following the billing month.

Sales to individuals are recognised in the reporting period in which electric power is consumed. Revenues from agreements with individuals include revenues for the last few days of the month after reading of the metering devices, which are recognised as a proportion of the total electric power sold for the billing month. An agreement with individuals provides for payment until the 25th day of the month following the billing month, based on the payment document to be issued by the Company. The billing period is one calendar month.

2 Basis of Preparation and Significant Accounting Policies (continued)

Offsetting

A portion of sales and purchases are settled by offset, barter or other non-cash settlements.

These transactions are settled generally as the exchange of dissimilar goods and services with the industrial and commercial customers in the form of offset.

Sales and purchases that are expected to be settled by mutual settlements, barter or other non-cash settlements are recognised based on the Group entities' management estimate of the fair value to be received or given up in non-cash settlements. The fair value is determined with reference to observable market information.

Non-cash transactions have been excluded from the consolidated cash flow statement. Investing and financing activities and the total of operating activities in these consolidated statements represent actual cash flows.

Segment reporting

Segments are reported in a manner consistent with the internal reporting provided to the Group's chief operating decision maker. Segments whose revenue, financial result or assets are ten percent or more of all the segments assets are reported separately.

Income taxes

Income taxes have been provided for in these consolidated financial statements in accordance with legislation of the Republic of Kazakhstan enacted or substantively enacted by the end of the reporting period.

The income tax charge comprises current tax and deferred tax and is recognised in profit or loss for the year except if it is recognised in other comprehensive income or directly in equity because it relates to transactions that are also recognised, in the same or a different period, in other comprehensive income or directly in equity.

Current tax is the amount expected to be paid to or recovered from the state budget in respect of taxable profits or losses for the current and prior periods. Taxable profits or losses are based on estimates if financial statements are authorised prior to filing relevant tax returns. Taxes other than on income are recorded within operating expenses.

Deferred income tax is provided using the balance sheet liability method for tax loss carry forwards and temporary differences arising between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes. In accordance with the exception for initial recognition, the deferred income tax is not accounted for if it arises from initial recognition of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting nor taxable profit. Deferred tax balances are measured at tax rates, which are expected to apply to the period when the temporary differences will reverse or tax loss carry-forwards will be utilised in accordance with tax rates enacted or substantively enacted at the end of reporting period. Deferred tax assets and liabilities are netted only within the individual companies of the Group. Deferred tax assets for deductible temporary differences and tax loss carry forwards are recorded only to the extent that it is probable that future taxable profit will be available against which the deductions can be utilised.

The Group controls the reversal of temporary differences relating to taxes chargeable on dividends from subsidiaries or on gains upon their disposal. The Group does not recognise deferred tax liabilities on such temporary differences except to the extent that management expects the temporary differences to reverse in the foreseeable future.

In determining the tax bases of the restoration and closure costs are added to the cost of property plant and equipment and ash dump restoration provision the Group allocates the future tax deductions to the liability. Under this approach the initial recognition exception does not apply.

Deferred tax liability is recognised in respect of the taxable temporary difference on the restoration and closure costs added to the cost of property plant and equipment and, subject to recognition criteria mentioned above, a deferred tax asset is recognised in respect of the deductible temporary difference on the ash dump restoration provision.

The Group's uncertain tax positions are reassessed by management at the end of each reporting period.

Liabilities are recorded for income tax positions that are determined by management (the assessment is based on the interpretation of tax laws that have been enacted or substantively enacted by the end of the reporting period and any known court or other rulings on such issues) as more likely than not to result in additional taxes being levied if the positions were to be challenged by the tax authorities. Liabilities for penalties, interest and taxes other than on income are recognised based on management's best estimate of the expenditure required to settle the obligations at the end of the reporting period. Adjustments for uncertain income tax positions are recorded within the income tax charge.

2 Basis of Preparation and Significant Accounting Policies (continued)

Uncertain tax positions

Management at the end of each reporting period evaluates the Group's uncertain tax positions. Liabilities reported in respect of income tax positions are taken into account when management believes that the likelihood of emergence of additional tax liabilities, in case the tax authorities challenge the tax position of the Group, is higher than the probability of their absence.

Such an assessment is conducted based on the interpretation of tax laws that are in force or in effect at the end of the reporting period, as well as any known court decisions or other decisions on such matters. Liabilities for fines, penalties and taxes, other than income tax, are presented on the basis of management's best estimate of the costs required to settle the obligations at the end of the reporting period. Adjustments to uncertain income tax positions are reported within income tax expense.

Transactions with Shareholder

The accrual of expenses or the distribution of assets at the discretion of the shareholder, including fixed assets, business combinations, interests in other entities and disposal groups, cash and other, are recognised in retained earnings as "Other equity distributions".

3 New Accounting Pronouncements

The following amended standards and interpretations became effective from 1 January 2020, but did not have any material impact on the Group:

- Amendments to the Conceptual Framework for Financial Reporting (issued on 29 March 2018 and effective for annual periods beginning on or after 1 January 2020).
- Definition of a business – Amendments to IFRS 3 (issued on 22 October 2018 and effective for acquisitions from the beginning of annual reporting period that starts on or after 1 January 2020).
- Definition of materiality – Amendments to IAS 1 and IAS 8 (issued on 31 October 2018 and effective for annual periods beginning on or after 1 January 2020).
- Interest rate benchmark reform - Amendments to IFRS 9, IAS 39 and IFRS 7 (issued on 26 September 2019 and effective for annual periods beginning on or after 1 January 2020).

New standards and interpretations

Certain new standards and interpretations have been issued that are mandatory for the annual periods beginning on or after 1 January 2021 or later, and which the Group has not early adopted.

- Sale or Contribution of Assets between an Investor and its Associate or Joint Venture – Amendments to IFRS 10 and IAS 28 (issued on 11 September 2014 and effective for annual periods beginning on or after a date to be determined by the IASB).
- IFRS 17 "Insurance Contracts" (issued on 18 May 2017 and effective for annual periods beginning on or after 1 January 2023).
- Classification of liabilities as current or non-current – Amendments to IAS 1 (issued on 23 January 2020 and effective for annual periods beginning on or after 1 January 2022).
- Classification of liabilities as current or non-current, deferral of effective date – Amendments to IAS 1 (issued on 15 July 2020 and effective for annual periods beginning on or after 1 January 2023).
- Proceeds before intended use, Onerous contracts – cost of fulfilling a contract, Reference to the Conceptual Framework – narrow scope amendments to IAS 16, IAS 37 and IFRS 3, and Annual Improvements to IFRSs 2018-2020 – amendments to IFRS 1, IFRS 9, IFRS 16 and IAS 41 (issued on 14 May 2020 and effective for annual periods beginning on or after 1 January 2022).
- Amendments to IFRS 17 and an amendment to IFRS 4 (issued on 25 June 2020 and effective for annual periods beginning on or after 1 January 2023).
- Interest rate benchmark (IBOR) reform – phase 2 amendments to IFRS 9, IAS 39, IFRS 7, IFRS 4 and IFRS 16 (issued on 27 August 2020 and effective for annual periods beginning on or after 1 January 2021).

Unless otherwise described above, the new standards and interpretations are not expected to affect significantly the Group's consolidated financial statements.

4 Critical Accounting Estimates, and Judgements in Applying Accounting Policies

The Group makes estimates and assumptions that affect the amounts recognised in the consolidated financial statements and the carrying amounts of assets and liabilities within the next financial year. Estimates and judgements are continually evaluated and are based on management's experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. Management also makes certain judgements, apart from those involving estimations, in the process of applying the accounting policies. Judgements that have the most significant effect on the amounts recognised in the consolidated financial statements and estimates that can cause a significant adjustment to the carrying amount of assets and liabilities within the next financial year include:

Impairment of non-financial assets

At each reporting date management assesses whether there is any indication of impairment of separate assets or groups of assets, and whether there is any indication that an impairment loss recognised in prior periods for separate assets or groups of assets other than goodwill may no longer exist or may have decreased.

If such indications exist, management estimates the recoverable amount of an asset, which is determined as the higher of an asset's fair value less costs to sell and its value in use. The calculation of value in use requires the application of the management's estimates and judgments, which are deemed appropriate under the current circumstances.

Assessment of impairment indicators also requires the use of judgments and estimates in determining possible technological obsolescence of fixed assets, discontinuing operations, residual useful lives, and other changes in operating conditions.

Under IAS 36, one of the possible impairment indicators is the presence of significant changes that had negative consequences for the Group that occurred during the year or are expected in the near future in the technological, market, economic or legal environment in which the Group operates or in the market for which the asset is used.

In assessing the recoverable amount of assets, the Group makes estimates and judgments. Estimates and judgments are repeatedly evaluated and based on management's experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. Management also makes certain judgments, apart from those involving estimations, in the process of applying the accounting policies.

Actions aimed at containment of COVID-19 significantly restrict economic activity in Kazakhstan, as well as they have and may continue to have a negative impact on businesses and Company's clients, as well as Kazakhstan and world economy for an uncertain time period. Therefore, future cash flows may be decreased and operating and other expenses may be increased, causing impact on the nature of electricity tariff regulation by the Government to support economy.

Modernisation of Almaty CHP-2 with the minimization of the environmental impact

For the execution of the instructions of the President of RK on taking actions to minimize emissions to atmosphere, the Group develops feasibility study ("FS"). At the first stage of the project, four modernization options for CHP-2 with the minimization of the environmental impact have been considered: transition of the existing boilers to gas flaring, reconstruction of the existing boilers with the installation of gas-handling equipment, extension of CHP-2 with the construction of CCGT plants and installation of additional gas-handling equipment without transition to natural gas and construction of a new gas-based plant. As a result of comparison of the implementation cost and environmental emissions, the first option of the reconstruction of existing boilers with their transition to gas flaring has been selected. The estimated cost of the project selected according to FS "Modernisation of Almaty CHP-2 with the minimization of the environmental impact of "Almaty Power Stations" JSC ("AIES) amounts to Tenge 131 billion. As of the date of this report, FS is at the stage of completion considering comments received from "Gosexpertise" RSE, and project cost is subject to adjustment.

On 20 October 2020, the Government of RK headed by the Prime-Minister, Mamin A.U., approved the first stage of the modernization of existing boilers of CHP-2 with transition to gas and construction of gas infrastructure. During the meeting, the Prime-Minister put the Ministry of Energy jointly with public authorities involved, JSC "SWF "Samruk-Kazyna" in charge of addressing the issue of making amendments, under procedure set by the legislation, to the Law of RK "On Power Energy" in terms of enabling the implementation of projects for the operating energy-producing organizations aimed at the settlement of ecological situation through the mechanism of electrical power market.

The Prime-Minister has also put "Samruk-Energy" JSC jointly with the Ministry of Energy, under the established procedure, in charge of continuing the work on raising bank borrowings to finance the project of CHP-2 transition to gas, including provision of gas infrastructure.

4 Critical Accounting Estimates, and Judgements in Applying Accounting Policies (continued)

In accordance with the instructions of the Prime-Minister of RK, the Ministry of Energy of RK prepared draft amendments to the Law of RK “On Power Energy” for the purposes of implementing project on the modernization of Almaty CHP-2. Draft amendments provide for an individual power tariff for the energy-producing organisations implementing investment projects on modernization and/or reconstruction of principal generating and additional equipment engaged in the electric energy generation to replace the type of principal fuel for the reduction of emission volumes. As of the date of this report, draft amendments to the Law of RK “On Power Energy” has been approved by the Government of RK and will be submitted to the Majilis of the Parliament of RK for consideration.

Making amendments to the Law of RK “On Power Energy” will ensure for the Group the return of borrowings and return on investments in future using the mechanism of electrical power market.

Based on the abovementioned, management does not expect any significant adverse consequences for the Group.

Analysis of the impairment indicators of property, plant and equipment

The Group’s management performed the analysis of the impairment indicators of property, plant and equipment of subsidiaries Ekibastuz GRES-1 named after Bulat Nurzhanov LLP (“EGRES-1”), Alatau Zharyk Company JSC (“AZhK”) and AIES JSC in accordance with IAS 36 “Impairment of Assets”.

The principal facts and assumptions used in the analysis of the impairment indicators are:

- lack of negative changes in the economic efficiency of subsidiaries for the reporting period;
- changes in interest rates on loans and long-term inflation rate are not significant;
- lack of significant changes having adverse consequences for subsidiaries, which occurred during the period or may presumably occur in the nearest future;
- approval by the Order of the Ministry of Energy No.205 dated 22 May 2020 of new estimation methodology for the fixed profit accounted for in power energy tariff (the “Methodology”), effective from 2021. The fixed profit is calculated based on involved assets of energy producing entities considering the weighted average return on capital rate (WACC) that will enable the Group receiving fixed profit for current assets and for commissioned new assets (RAB-regulation).

The Methodology provides for the coverage of production costs, including amortisation expenses, and fixed profit set at the level of the base of involved assets of energy producing entities multiplied by weighted average return on capital rate (WACC). As a result, the methodology provides for the receipt of fixed profit after covering all costs, except for interest expenses.

In 2020, the Group engaged an independent expert to measure the fair value of assets included in the base of involved assets under new methodology. According to estimates based on the fair value of the base of involved assets, the Group’s management expects significant increase in the cap electricity tariff due to inclusion of profitability level pursuant to methodology. Complete transition to RAB-regulation and tariff approval according to new methodology is expected from 1 July 2021.

Additional facts and assumptions used in the analysis of the impairment indicators on AIES JSC:

- electricity sales volumes and tariffs, services on maintenance of electrical capacity, heat energy and chemically purified water, and amount of capital expenses comply with the AIES JSC’s management budget used in the last measurement of the recoverable value of the AIES JSC’s assets;

Additional facts and assumptions used in the analysis of the impairment indicators on EGRES-1:

- Overachievement of target on main operational and financial performance indicators as of 31 December 2020;
- The forecasted mid-term growth of demand for electricity in northern and southern areas of the Republic of Kazakhstan, as well as forecasted increase in electricity sales volumes due to work in seven-block mode and available capacity;
- Expectation of an individual tariff for services on maintenance of electrical capacity from 2025 due to the completion of the investment project “Restoration of Power Unit 1 with the installation of new electrostatic precipitators” using borrowing funds. In accordance with the Rules of the Ministry of Energy, on 30 January 2020 an application for the Market Council was submitted. Currently, a recommendation from the Market Council has been received on further consideration of application for an individual tariff for services on maintenance of electrical capacity by the Ministry of Energy.

4 Critical Accounting Estimates, and Judgements in Applying Accounting Policies (continued)

Based on analysis performed with respect to internal and external impairment indicators, the Group's management concluded that there are no impairment indicators as of the analysis date. Therefore, the Group's management decided not to perform the impairment test of property, plant and equipment and intangible assets of these subsidiaries as of 31 December 2020.

Impairment test

Based on the analysis as at the end of 2020, management identified impairment indicators of property, plant and equipment of its subsidiaries: Tegis Munay LLP and its subsidiary Mangyshlak Munay ("Tegis Munay") and joint venture Station Ekibastuz GRES-2 JSC ("SEGRES-2"), and, accordingly, its investment in SEGRES-2.

The Group engaged independent experts to conduct the impairment test of Tegis Munay and SEGRES-2, in accordance with IAS 36 "Impairment of Assets". The impairment test of Tegis Munay assets was performed by management similarly with the methodology used by independent experts in the impairment test of other Group companies. The recoverable amount of property, plant and equipment and intangible assets was determined using the estimate of expected future cash inflows and outflows from use of the assets, discount rate and other factors.

The Group's management considers all property, plant and equipment and intangible assets as a single cash generating unit since it is the smallest identifiable group of assets that generates cash inflows largely independent of the cash flows of other assets and it is the lowest level at which each subsidiary monitors recovery of the assets' cost. Management estimated the recoverable amount of property, plant and equipment based on value in use determined as estimated discounted future cash flows that the Group expects to obtain from their use.

Management of SEGRES-2 used the value in use of cash generating unit to estimate the recoverable amount. The estimated recoverable amount of property, plant and equipment exceeded their carrying amount upon the results of the impairment test as of 30 November 2020. However, any adverse change in principal assumption may lead to impairment. Principal assumptions with respect to the recoverable amount were as follows:

Electricity tariffs – for the purpose of calculating the recoverable amount of assets, the Group's management used the following electricity tariffs:

- Weighted average tariff for 2020 was Tenge 8.43 per 1 kWh, which represents the actual tariff applicable to electricity sale by the Group in 2020 and does not exceed the cap tariff of Tenge 9.13 per 1 kWh established and approved by the Ministry of Energy for 2019-2025.
- Projected weighted average tariffs for subsequent periods are as follows:

	2021	2022	2023	2024	2025	2026	2027	2028
Electricity tariff (Tenge/kWh)	9.13	9.13	9.13	9.13	9.13	11.40	14.91	16.17
Tariff for the power capacity (thousand Tenge per 1 MW a month)	590	622	655	690	726	3.711	3.675	3.641
	2029	2030	2031	2032	2033	2034	2035	
Electricity tariff (Tenge/kWh)	16.45	16.73	17.00	17.25	17.55	17.96	18.51	
Tariff for the power capacity (thousand Tenge per 1 MW a month)	3.609	3.579	3.555	3.534	3.525	1.136	1.199	

The forecast of tariff was based on management's expectations for resumption of the project on construction of power unit No.3 in 2023. A significant increase in the tariff for power capacity in 2026 is due to the expected commissioning of power unit No.3 and changes in the tariff structure, which is related to introduction of power capacity market in the Republic of Kazakhstan. According to the Law of the Republic of Kazakhstan *On Electric Power Industry*, the Group is able to obtain an individual tariff for the power capacity. Establishing an individual tariff is possible provided the completion of power unit No.3 with the capacity of 630 MW and conclusion of an investment agreement with the competent authority. Calculation of individual tariffs, in addition to operating expenses of the SEGRES-2, takes into account the necessary amount to cover the costs which are associated with the investment component and incurred for the completion of Power Unit 3. A decrease in the tariffs for electricity and power capacity within the acceptable range by 10% will result in additional loss on impairment of investment of not more than Tenge 17,632,291 thousand.

4 Critical Accounting Estimates, and Judgements in Applying Accounting Policies (Continued)

Electricity production and sales volumes – for the calculation of the recoverable amount of assets, the Group considered forecasted volumes of production/sales of electricity by power unit No.3 and relevant investments needed to complete construction. The Group used the following estimated volumes of electricity sales for the calculation of the recoverable amount of assets:

SEGRES-2	2021	2022	2023	2024	2025	2026	2027	2028
Sales of electricity (mln. kWh)	6.427	5.923	5.921	5.922	6.039	5.926	6.066	6.209
Sales of electrical power capacity (MW)	625	641	650	671	701	1.309	1.334	1.360

SEGRES-2	2029	2030	2031	2032	2033	2034	2035
Sales of electricity (mln. kWh)	6.355	6.505	6.658	6.815	6.976	7.141	7.309
Sales of electrical power capacity (MW)	1.387	1.415	1.444	1.475	1.500	1.500	1.500

Management believes that production and sales volumes during the forecast period prior to commissioning of the Power Unit No.3 will be stable. After the launch of the power unit No.3, SEGRES-2 does not predict any significant increase in electricity volumes, however the electricity production volume will be distributed among the three power units of the company.

Discount rate – the discount rate of 14.19%, was estimated taking into consideration the current market assessment of risks inherent to SEGRES-2 on the basis of the weighted average cost of capital for the industry. In the future, to reflect changing risks inherent to the industry and changes in the weighted average cost of capital, further changes in the discount rate may be required. 1% increase in the discount rate would result in an impairment loss of investment of Tenge 1,417,767 thousand.

Impairment test for property, plant and equipment and intangible assets of Tegis Munay

Proved and probable gas reserves are used in the impairment test. There are many uncertainties associated with the estimation of gas reserves, in particular assumptions that are valid at the time of the assessment, may change significantly when new information is available. Changes in forecast commodity prices, exchange rates, production costs or return rates can change the economic condition of reserves and eventually lead to changes in reserves.

Management makes estimates and assumptions concerning the future. By definition, accounting estimates rarely equal the corresponding actual results. Such estimates and assumptions are constantly measured and based on historical experience and other factors, including expectations of future events that are considered reasonable in the current environment. The recoverable amount was measured using value in use.

Gas production commencement terms

It is forecasted that natural gas production will commence in 2024, and it is assumed that 65% of gas production will be exported starting from 2024.

The gas production commencement is postponed because the contract territory is included in the territory of South-Kazakhstan state conservation area, where it is prohibited to perform field facilities construction and development prior to territory separation from the protected areas. Currently, the authorized public bodies perform work on expansion of protected area borders considering the separation of the contract territory.

Therefore, Tegis Munai contacted the Ministry of Energy of RK (“ME RK”) with the question of the relevance of production period commencement extension, field facilities construction for gas production, postponement of deadline for the implementation of working program and contract’s validity period since the issue of contract territory separation is not settled yet. In September 2020, the subsurface use expert commission of ME RK decided to postpone the following financing liabilities: education; R&D; social and economic development of the region, and an abandonment was given in terms of working program amendment on investment liabilities under subsurface use contract.

On 3 December 2020, Tegis Munai has sent an application to the Supreme Court of RK on invalidation of the ME RK abandonment in terms of working program amendment on investment liabilities under subsurface use contract. On 30 December 2020, Tegis Munai received force-majeure certificate from the Chamber of Commerce of Kazakhstan LLP comprising Atameken NCE confirming that Tegis Munai is not able to perform subsurface use contract commitments prior to the contract territory separation from the protected areas and is not able to perform subsurface use operations. Force-majeure circumstances are in force until the contract territory separation from the protected areas.

4 Critical Accounting Estimates, and Judgements in Applying Accounting Policies (continued)

The recoverable amount was calculated using the discounted cash flow model based on proved and probable reserves using estimated oil and gas prices and a post-tax discount rate of 14.6% (2019: 13.9%). Based on the results of impairment testing, the recoverable amount of assets at 31 December 2020 is less than the carrying amount of property, plant and equipment by Tenge 315.7 million. The Group recorded the impairment of loss of property, plant and equipment within other expenses.

According to the calculated value in use, the following forecast prices for oil sales in US dollars per barrel, which was based on the Bloomberg price forecasts dated 31 December 2020, and management also assumed that gas export prices at the Chinese border are related to the oil price due to high correlation between them, which is supported by the analysis.

<i>In US Dollars</i>	2024	2025	2026	2027
Oil Price per Barrel (Brent)*	56.76	64.57	65.93	67.31
Estimated export gas price on the Chinese border per thousand m3	195	208	224	229

*source: Bloomberg

Accounting for property, plant and equipment

Property, plant and equipment with a carrying value of Tenge 16,160,877 thousand represent the assets of the First Wind Power Plant (PVES) of Tenge 15,115,505 thousand and Kapchagai Solar Power (Kapchagai SES) of Tenge 1,045,372 thousand.

The Settlement and Financial Centre, KEGOC's subsidiary, acts as an agent that buys the entire volume of electricity generated by renewable energy companies and resells it to stations powered by coal and hydrocarbons. The total volume of electricity is purchased from the power plants at a specified tariff above the market, which is annually adjusted to the inflation rate.

According to IFRS 16, arrangements of this nature may contain a lease. Upon review of IFRS 16 criteria, management concluded that this arrangement is an operating lease, whereby PVES and Kapchagai SES act as lessors. Accordingly, revenue from electricity of these stations was included in rental income from these power plants.

Recognition of revenue from electricity sales

The Group recognises revenue when the electricity is supplied according to the meter readings of the consumers. The meter readings are provided by the customers on a monthly basis and checked by the Group for correctness on a sample basis.

Since the procedures for invoicing of the consumed electricity have a cycle nature, the Group sold the significant volume of electricity at the end of the reporting period, for which invoices have not been issued to the customers.

The Group recognises revenue for electricity sold from the moment of the last meter reading taking to the end of the reporting period on the basis of estimate. According to the Group's approach, the daily amount of purchased electricity consumed but not invoiced is determined as at the end of the reporting month which is then multiplied by the selling price.

Useful lives of property, plant and equipment

The estimation of the useful lives of items of property, plant and equipment is a matter of judgment based on the experience with similar assets. The future economic benefits embodied in the assets are consumed principally through use. However, other factors, such as technical or commercial obsolescence and wear and tear, often result in the diminution of the economic benefits embodied in the assets. Management assesses the remaining useful lives in accordance with the current technical conditions of the assets and estimated period during which the assets are expected to earn benefits for the Group.

The following primary factors are considered: (a) expected usage of the assets; (b) expected physical wear and tear, which depends on operational factors and maintenance programme; and (c) technical or commercial obsolescence arising from changes in market conditions.

If the estimated useful lives were different by 10% from management's estimates, the depreciation for the year ended 31 December 2020 would have been higher/lower by Tenge 5,725,610 thousand (31 December 2019: higher/lower by Tenge 5,556,713 thousand).

4 Critical Accounting Estimates, and Judgements in Applying Accounting Policies (continued)

Balkhash Thermal Power Plant

On 29 October 2019, the Company acquired 50% + 1 share of BTPP from Samsung C&T and became the owner of 100% interest in BTPP. As of the acquisition date, BTPP was on the brink of bankruptcy and did not actually perform any significant activities. Since 2017, creditors and suppliers have repeatedly sued due to the insolvency of BTPP, which in turn led to the seizure of property, and also significantly limited the activities of BTPP. On 6 December 2019, a temporary administrator was appointed by the court to control and conduct the bankruptcy process.

Due to the enactment of quarantine measures and actions taken by state to support national economy, according to the Decree of the Government of the Republic of Kazakhstan dated 14 July 2020 No.443 it was ordered to suspend until 1 October 2020 the bringing before the court by creditors represented by public authorities and quasi-public sector entities of bankruptcy petitions with respect to legal entities and individual entrepreneurs, hence BTPP bankruptcy procedure has been temporarily suspended. As of 31 December 2020, legal proceedings on BTPP are not permitted yet and thus according to the management the Group does not have control and investments in BTPP are impaired in full.

Acquisition of a share in SEGRES-2 by the parent company NWF Samruk-Kazyna

In December 2019, NWF Samruk-Kazyna, the parent company of the Group, declared the acquisition of a 50% share in SEGRES-2 from PJSC Inter RAO UES, and thus received full control over EGRES-2, a 50% ownership interest directly and 50% of the ownership interest through a share in the Group.

In September 2020, NWF Samruk-Kazyna and the Group signed joint management agreement, and its terms and conditions are generally identical to the previous co-management agreement between the Group and PJSC Inter RAO UES. One of the key points of the co-management agreement is the agreement of the parties on "periodic change in the operational and financial management" between the parties.

In accordance with the charter of SEGRES-2, the Group is entitled to a share of profit in SEGRES-2, based solely on the extent of its share in the joint venture, and the charter or agreement does not stipulate that the Group will receive remuneration for managing the joint venture.

Given the above factors and the future terms of the co-management agreement, management believes that the Group did not gain control over SEGRES-2 as a result of changes in the structure of shareholders of SEGRES-2. Accordingly, the management of the Group continues to account for the investment in SEGRES-2 using the equity method, since it believes that the role of the Group in the joint venture has not changed, from the date of acquisition of the share by the parent company to the reporting date.

Payable to the Akimat

In 2009 AZhK was involved in litigation with the Akimat of Almaty city ("Akimat") related to the settlement of AZhK payables to Akimat. On 14 February 2014 AZhK and Akimat signed an amicable agreement for the settlement of AZhK liabilities. To settle the liabilities, among other procedures, AZhK shall accept power lines, being in the communal ownership and under trust management of the Akimat, and Akimat assumes to write-off the liabilities of AZhK. The amount of liabilities of the AZhK to Akimat, after deduction of all payments made during the previous years as part of a settlement, as of 31 December 2020 is Tenge 5,841,514 thousand (31 December 2019: Tenge 5,841,514 thousand). As of 31 December 2020, the transfer of ownership over power lines has not been completed. The Group will derecognise this liability when it is exempted from payments, i.e. at the time of implementation of all actions by the parties to the amicable agreement, particularly at the time of the assuming the ownership over power lines from the Akimat. At the same time, the Group recognises a gain from write-off of the liability in the amount of Tenge 5,841,514 thousand.

5 Segment Information

Operating segments are components that engage in business activities that may earn revenues or incur expenses, segment operating results are regularly reviewed by the chief operating decision maker (CODM) and for which discrete financial information is available. The CODM is the person or group of persons who allocates resources and assesses the performance for the entity. The functions of the CODM are performed by the management board of the Group.

CODM monitors the revenue and operating profit. CODM also monitors the EBITDA, which is calculated as profit/ (loss) for the period before accounting for finance income and finance expense, income tax expenses, depreciation of property, plant and equipment and amortisation of intangible assets, impairment of property plant and equipment and investment property, impairment of goodwill, share of profit/(loss) of associates and joint ventures and effects, related to acquisition and other similar effects. Sequence for identification of adjusted EBITDA by Group might be different from sequence used by other companies.

(a) Description of products and services from which each reportable segment derives its revenue

The Group is organised on the basis of three main business segments:

- Production of electric and heating energy.
- Transmission and distribution of electricity.
- Sale of electricity.

(b) Performance of operating segments

The CODM evaluates performance of each segment based on a measure of revenue and pre-tax profit.

(d) Analysis of revenues by products and services

The Group's revenues are analysed by products and services in Note 21 (revenue from core activities). Majority of sales of the Group are within Kazakhstan.

5 Segment Information (continued)

(e) Major customers

In 2020, more than 10% of the total revenues were derived from sales to the companies under control of Samruk-Kazyna (Note 6). During the year ended 31 December 2020, there were no other customers for which sales of the Group represented 10% or more than 10% of the total revenues.

The Group's revenues are recorded during the period when obligations are performed, in accordance with IFRS 15.

6 Balances and Transactions with Related Parties

Related parties are defined in IAS 24, Related Party Disclosures. Parties are generally considered to be related if one party has the ability to control the other party, is under common control, or can exercise significant influence or joint control over the other party in making financial and operational decisions. In considering each possible related party relationship, attention is directed to the substance of the relationship, not merely the legal form. The Company's parent entity and ultimate controlling party are disclosed in Note 1.

The related parties include the companies under control of Samruk-Kazyna. Transactions with government-run companies are not disclosed if they are carried out in the ordinary course of business in accordance with conditions consistent with all public and private companies i) when they are not individually significant; ii) if the Group's services are provided on standard terms available to all consumers, or iii) provided there is no choice of providers of services such as electricity transmission services, telecommunications services, etc.

The Group purchases from and sells goods to a large number of government related entities. Such purchases and sales are individually insignificant and are generally entered into on an arm's length basis. Transactions with the state also include taxes which are detailed in Note 28.

At 31 December 2020, the outstanding balances with related parties were as follows:

<i>In thousands of Kazakhstani Tenge</i>	Companies under common control	JVs and associates of Samruk-Energy	JVs and associates of Samruk-Kazyna	Shareholder	Government related entities
Trade and other receivables	4,750,550	-	17,611	-	12,258,166

Foreign exchange gain/(loss)	-	48,787	-	1,040,400	(72,301)

In June 2020, Samruk-Kazyna JSC acquired 125 shares of the Company at the price of Tenge 21,848,312 totalling Tenge 2,731,039 thousand under pre-emption right and repaid shares purchased through the transfer to the Company of wind-electric and solar-power equipment. Further, these property, plant and equipment were transferred to the property of Samruk-Green Energy LLP.

At 31 December 2020, the Group has following outstanding guarantees from related parties:

- Corporate guarantee from Samruk-Kazyna in the amount of Tenge 12,285,000 thousand for outstanding loan to Development Bank of Kazakhstan JSC (2019: Tenge 12,285,000 thousand).
- Governmental guarantee in the amount of US Dollars 25,000,000 for outstanding loan to Development Bank of Kazakhstan JSC (2019: US Dollars 25,000,000).

Key management compensation is presented below:

<i>In thousands of Kazakhstani Tenge</i>	2020	2019
Key management compensation	210,832	139,906
Total key management compensation	210,832	139,906

Key management personnel compensation represents the salaries, bonuses and other short-term employee benefits. Key management personnel as at 31 December 2020 include 5 persons (31 December 2019: 5 persons).

Transactions with related parties are made on terms agreed between the parties that do not necessarily correspond to market rates, with the exception of regulated services that are provided on the basis of the tariffs approved by the Order of the Minister of Energy *On Approval of Cap rates for Electricity for a Group of Energy-Producing Companies*.

Disposals		(150,619)	(31,855)	(616)	-	(183,090)
Carrying amount at 31 December 2020		2,177,503	37,394	922,727	-	3,137,624

The Group recognised the following lease liabilities:

<i>In thousands of Kazakhstani Tenge</i>	31 December 2020	31 December 2019
Current lease liabilities	1,106,004	1,036,163
Non-current lease liabilities	1,696,109	1,660,455
Total lease liabilities	2,802,113	2,696,618

Interest expenses included in finance costs in 2020 amounted to Tenge 275,850 thousand (2019: Tenge 430,728 thousand). The costs of variable lease payments not included in lease liabilities that are attributed to general and administrative expenses in 2020 amounted to Tenge 114,180 thousand (2019: Tenge 91,145 thousand).

10 Investments in Joint Ventures and Associates

The table below summarises the movements in the carrying amount of the Group's investment in joint ventures and associates.

<i>In thousands of Kazakhstani Tenge</i>	Joint ventures		Associates	Total
	SEGRES-2	Forum Muider B.V.	Energiya-Semirechya	
Balance at 1 January 2019	18,852,903	37,007,597	-	55,860,500
Share of profit/(loss) for the year	(1,065,478)	12,242,760	14,156	11,191,438
Dividends accrued	-	(15,311,935)	-	(15,311,935)
Contributions to the authorized capital without changing the share of ownership	-	-	2,403,501	2,403,501
Balance at 31 December 2019	17,787,425	33,938,422	2,417,657	54,143,504
Share of profit/(loss) for the year	(1,853,112)	11,504,368	(177,743)	9,473,513
Dividends accrued	-	(3,005,818)	-	(3,005,818)
Balance at 31 December 2020	15,934,313	42,436,972	2,239,914	60,611,199

At 31 December 2020, the Group has interests in the following jointly controlled entities:

- SEGRES-2 – 50%. The remaining 50% interest is owned by National Welfare Fund Saruk-Kazyna JSC (Note 4).
- Forum Muider – 50%. The remaining 50% is owned by UC RUSAL.

In December 2019, Samruk-Kazyna NWF acquired 50% ownership interest from PJSC Inter-RAO UES for US Dollars 25 million.

The Group has a share in the Energiya-Semirechya LLP associate (25%). Energiya-Semirechya LLP plans to build a renewable energy source station. The shareholders of Energiya-Semirechya LLP are Hydrochina Corporation (interest share of 50%), Samruk Energy JSC (interest share of 25%), Powerchina Chegdu Engineering Corporation (interest share of 15%), and Powerchina Resources Ltd (interest share of 10%). The Group's ownership interest in Energiya-Semirechya LLP has not changed due to the proportional contribution to the authorized capital by all shareholders according to their ownership interests.

The only difference at reconciliation of the amounts below and carrying values of investments in associates and joint ventures is the excluded share of other investors in these associates and joint ventures.

The Group's management believes that the Group's share in net assets in associates and joint ventures is limited to the investment in the associate.

Contingencies related to the Group's share in joint ventures are disclosed in Note 29. Related party balances and transactions are presented in Note 6.

10 Investments in Joint Ventures and Associates (continued)

Uncontracted electric power consumption by consumers in the Almaty power hub

During 2020, differences occurred between Alatau Zharyk Company JSC (“AZhK”) and AlmatyEnergoSbyt LLP in volumes between power energy transmission and sale. These differences occurred as a result of uncontracted connection to AZhK electric power networks of entities located within the territory of the Industrial Zone – Almaty LLP.

On 18 March 2020, AZhK sent a letter to the Industrial Zone – Almaty LLP demanding an explanation of the uncontracted connection to AZhK network and execution of relevant contracts for the further provision of services. Also, on 16 April 2020, AZhK requested the Almaty City Akimat to render assistance in settling the issue of power supply, calculation of the accrual and reimbursement of costs relating to the Industrial Zone – Almaty LLP. AZhK has repeatedly applied to the Almaty City Akimat on 4 June 2020 with a demand to solve a disbalance of power energy volumes with entities located in the Industrial Zone, and a request to render assistance in settling the issue of ensuring reliable power supply to these consumers.

As a results of activities performed, AZhK concluded that Almaty Kuat LLP not having contractual relationship for acquiring power energy and rendering services on electricity transmission provided power supply services to consumers within the territory of the Industrial Zone – Almaty LLP by connecting to AZhK electric power networks without any electricity supply or transmission contract.

As of 31 December 2020, the Group created provision of Tenge 132,281 thousand for trade receivables, which represent uncontracted electric power consumption by consumers within the territory of the Industrial Zone – Almaty LLP.

On 15 January 2021, the Group has sent a letter to the Economic Investigations Department with a request to take actions with respect to Almaty Kuat LLP.

Other receivables

Other receivables primarily include short-term receivables from the buyers of subsidiaries of Tenge 9,022,234 thousand, there were sold in 2017, and receivables of Tauba Invest LLP of Tenge 760,025 thousand. Receivables from Tauba Invest LLP are secured by the pledge agreement for immovable property dated 26 April 2018. In the reporting period, Tauba Invest LLP has paid its arrears for Tenge 222,961 thousand.

In the absence of enough information on Tauba Invest LLP, in calculating the expected credit loss model, the Group assigned a SK D rating and recognised an impairment of Tenge 183,865 thousand. The receivables of customers of subsidiaries that were sold during 2017 as of 31 December 2020 in the amount of Tenge 8,965,447 thousand are payable from the East Kazakhstan Regional Energy Company LLP with an internal rating of SK C, in the amount of Tenge 56,787 thousand, from Inform-System LLP with an internal rating of SK C. Due to the East Kazakhstan Regional Energy Company LLP's request on deferral of payment due to negative consequences caused by force majeure circumstances related to COVID-19, the Group's management decided to extend deadline for the repayment of debt until 1 October 2021 subject to the indexation of receivables from Tenge 8,274,000 thousand to Tenge 9,382,798 thousand. As of 31 December 2020, the carrying amount of receivables from East Kazakhstan Regional Energy Company LLP is Tenge 7,789,258 thousand considering impairment provision of Tenge 1,176,189 thousand and discounting effect.

Samruk-Energy JSC

Samruk-Kazyna

On 17 March 2010 the Group signed a loan agreement with Samruk-Kazyna for amount of Tenge 48,200,000 thousand for the purpose of re-financing of debt arising as the result of acquisition of 50% interest in Forum Muider. The loan carries an interest rate of 1.2% per annum with maturity not later than 15 September 2029. The principal amount is payable in equal annual instalments and interest is payable by semi-annual payments starting from the following reporting year after the receipt of loan.

On 14 January 2011 the Company signed a loan agreement with Samruk-Kazyna for amount of Tenge 7,000,000 thousand for the purpose of financing construction of substation of Alatau Zharyk Company JSC. The loan carries an interest rate of 2% per annum with maturity not later than 25 January 2024. The principal amount is payable at maturity and interest is payable by semi-annual payments.

On 16 January 2014 the Company signed a loan agreement with Samruk-Kazyna for amount of Tenge 200,000,000 thousand for the purpose of acquisition of remaining share in EGRES-1. The principal amount is payable on 1 December 2028 and interest at 7.8% is payable by semi-annual payments.

On 3 October 2014 the loan agreement was substantially modified pursuant to the addendum No.1 to the loan agreement No.369 in the following way:

- Principal amount of Tenge 100,000,000 thousand was converted to the Company's shares
- Interest rate on the remaining principal amount was increased to 9%.

On 25 December 2015 the loan agreement was significantly amended in accordance with the addendum No.2 to credit agreement No.369-I, the interest rate on the principal amount was reduced to 1% per annum. Management estimates that the reduction of the interest rate to a non-market rate of 1% and the change of the priority of a loan to a subordinated one represent a significant modification in the loan terms. Management believes that such change in the conditions of the loan should be considered as a settlement of the original loan and recognition of a new loan at a fair value. At the loan origination date, the market rate was 12.8% per annum. The Company recognised a gain on initial recognition of the loan of Tenge 72,581,903 thousand as part of other reserves. Management believes that by providing a loan at the below-market rate, Samruk-Kazyna acted as the Company shareholder. Gain on initial recognition of the loan was recorded as the difference between the nominal value and fair value at the recognition date, calculated using the discounted cash flow method at the effective rate of 12.8% per annum.

Bonds

In August and September 2017, the Company issued and placed bonds for a total of Tenge 20,000,000 thousand and Tenge 28,000,000 thousand, respectively, with a nominal value of Tenge 1,000 per bond with a five-year term. The coupon rate was 13% per annum and 12.5% per annum, respectively, and is payable twice a year and on a quarterly basis, respectively. On 18 February 2019, the Company performed a buyback of the bonds of the second tranche in the amount of Tenge 28,000,000 thousand. In April 2019, the Company performed a buyback of 16,872,498 bonds of the first tranche at a market price of tenge 17,655,846 thousand. As of 31 December 2019, the balance of the main debt for the first tranche is Tenge 3,127,502 thousand.

In November 2018, the Company issued and placed bonds in the amount of Tenge 21,736,200 thousand with a nominal value of 1,000 Tenge per 1 bond for a period of seven years. The coupon interest rate was 11.2% per annum and is payable twice a year.

European Bank for Reconstruction and Development

In December 2016 the Company opened a non-revolving line of credit for EUR 100 million to refinance Eurobonds. In September 2019 the Company received two tranches of Tenge 39,114,450 thousand within this credit facility All-in-cost, which is calculated based on inflation, plus margin of 3.5% and 4.5% per annum. Changes in the independent indicative interest rate are recorded on a quarterly basis. The principal is payable twice a year and at maturity. As of 31 December 2020, the nominal balance of debt principal on the first tranche is Tenge 18,253,410 thousand.

Halyk Bank of Kazakhstan JSC

During 2020, Samruk-Energy JSC within revolving credit facility received 3 short-term tranches totalling Tenge 2,000,000 thousand under credit line in Halyk Bank of Kazakhstan JSC for the period of up to 6 months, including Tenge 2,000,000 thousand repaid in advance during the reporting period. As of 31 December 2020, there is no outstanding debt principal payable to Halyk Bank of Kazakhstan JSC.

18 Borrowings (continued)

Asian Development Bank

On 8 November and 5 December 2018, the Company opened non-revolving credit facilities in the amount of USD 120 million with the Asian Development Bank in order to increase the operational efficiency of core activities and identify opportunities associated with renewable energy sources. In 2019, the Company received three tranches under Credit facilities for a total of Tenge 45,860,800 thousand with maturities of tranche A and B after 5 years, tranche C after 7 years. The interest rate is set on the basis of actual inflation indicators of the Republic of Kazakhstan (All-in-cost), plus bank margin (3.75% on Tranches A and B, 4.50% on Tranche C). Debt principal is payable on maturity: for Tranches A and B – in 2024, for tranche C – in 2026.

Sberbank JSC SB

During 2020, Samruk-Energy JSC received 6 short-term tranches within a revolving credit facility totalling Tenge 13,100,000 thousand under a credit line in Sberbank JSC SB for the periods of up to 3 months. As of 31 December 2020, there is no outstanding debt to Sberbank JSC SB.

Alatau Zharyk Company JSC

Loans from consumers

In accordance with the Resolution of Government of the Republic of Kazakhstan dated 21 February 2007, the AZhK received loans from consumers for additional power capacities through construction of power transmission lines and infrastructure of electricity grid connection or reconstruction of the existing power transmission lines and infrastructure until 1 January 2009. These loans are interest-free and not secured by any collateral. The loans from consumers are repayable by equal payments within 20 years, beginning from the 4th year from the AZhK's receipt of the loans.

The loans from customers were initially recognised at their fair value applying the discounted cash flow method and using the prevailing market interest rate; and subsequently carried at amortised cost. Loans from consumers for the connection of additional power capacity as of 31 December 2020 amount to Tenge 1,399,367 thousand (31 December 2019: Tenge 1,551,256 thousand). The difference between the nominal value of funds received and their fair value at initial recognition was recorded as deferred income.

Halyk Bank of Kazakhstan

In 2015, the AZhK entered into a credit facility agreement with Halyk Bank of Kazakhstan JSC ("Halyk Bank") (the "Agreement"). In accordance with the Agreement, the total amount of the credit facility is Tenge 27,514,358 thousand, of which:

- Tenge 1,745,211 thousand with an interest rate of 12% per annum in Tenge for 5 years until 1 July 2022 ("Limit 1"). Purpose of Limit 1 - construction and installation work on reconstruction and construction of a new HV line - 0,4 kW according to REN-5 with transfer to a self-supporting insulated wire, reconstruction of inappropriate TS-6-10/0,4 kW operational requirements and construction of TS-6-10 / 0.4 kW;
- Tenge 6,458,480 thousand with an interest rate of 12% per annum for 5 years until 24 November 2020 ("Limit 3"). The purpose of Limit 3 is work related to the transfer of part of the loads from the existing substation No. 4 to the newly built substation 110/10-10 kW Alatau;
- Tenge 6,347,181 thousand with an interest rate of 12% per annum for the period until 1 July 2022 ("Limit 4"). The purpose of Limit 4 is to transfer existing 6 kW to 10 kW networks from PDS-41, transfer existing 6 kW to 10 kW networks across REN-1 in the area of substation-1A, transfer part of the loads from existing substation-5A, substation-17A and substation-132A to the newly built substation 110/10 Otrar;
- Tenge 7,500,000 thousand with an interest rate of 12.5% per annum until 1 July 2022 ("Limit 6"). Purpose of Limit 6 is the repayment of debt on issued bonds (refinancing);
- Tenge 800,000 thousand tenge with an interest rate of 12.0% per annum until 1 March 2020 ("Limit "). Purpose of Limit 9 is the payment under contracts;
- Tenge 4,463,486 thousand with an interest rate of 12.5% per annum until 31 August 2023 ("Limit 10"). Purpose of Limit 10 is the repayment of debt on issued bonds (refinancing).

On 25 September 2019, the Board of Directors of the AZhK made a decision on the disposal of 2,804,746 shares for the benefit of Samruk-Energy JSC, at a placement price of Tenge 520 per share for the amount of Tenge 1,458,468 thousand.

On 29 October 2019, the proceeds from the sale of shares were used to repay the loan of Tenge 1,458,468 thousand raised from Halyk Bank of Kazakhstan JSC.

18 Borrowings (continued)

In accordance with the addendum, starting from 20 February 2020, fixed rates of interest were changed by 12% for Limits – 6 and 10.

As security for the obligations of under the Agreement, the Halyk Bank is provided (will be provided) as a pledge – current account money in Halyk Bank.

Within credit Limit - 4 tranches were received for the total amount of Tenge 2,945,009 thousand, the remaining Limits were spent in full, with the exception of Limit - 3. The loan amount shall be repaid monthly, in equal installments, starting from the date of the loan. Repayment is regulated by repayment schedules in accordance with loan agreements.

Ereymenau Wind Power LLP

Eurasian Development Bank

Under non-revolving credit facility agreement No.193 dated 31 October 2019, Ereymenau Wind Power LLP (“EWP”) raised a long-term loan for construction of a wind power electric plant in Akmola region. The interest rate for tranches issued during seven years from the enforcement date of credit facility agreement is 11.5% per annum, for tranches expiring after the first seven years of the agreement – base rate amount plus margin.

Almaty Electric Stations

Halyk Bank of Kazakhstan JSC

26 November 2014 the Company signed a credit facility agreement with Halyk Bank of Kazakhstan JSC (“Agreement”). The effective interest rate is 12.7% - 15.2%. Loan is repayable in 2021-2025.

The purpose of the loan is to refinance loan associated with the Company’s investment project “Almaty CHP-2 Reconstruction and Expansion. III Phase. Boiler Unit No.8”, refinance payables on the index-linked bonds in issue, refinance payables to the BankCenterCredit JSC, finance investment project “Reconstruction of CHP-3 ash dump”. These loans are collateralized by cash to be received in future under contract with Almatyenergysbyt LLP, Alatau Zharyk Company JSC, and Almaty Heating Networks LLP.

Moinak HPS JSC

Development Bank of Kazakhstan JSC

On 14 December 2005 and 16 January 2008, the Company received a loan in two tranches from the Development Bank of Kazakhstan JSC, a related party, in the amount of US Dollars 25,000,000 and US Dollars 26,058,000 at an interest rate of 1.15*6MLIBOR + 1.5% and 8% per annum, accordingly. Loans were granted for 20 years. On 6 December 2012, the Company signed an addendum to amend the interest rate of the second tranche from 8% to 7.55%, relating to the amount of US Dollars 1,563,053 for further borrowings.

On 17 June 2011 the Company signed a contract with the Development Bank of Kazakhstan JSC for the third tranche of Tenge 12,285,000 thousand at an interest rate of 12% per annum. The loan has been provided for 17 years. On 6 December 2012, the Company signed an addendum on amending the interest rate of the third tranche from 12% to 7.55%, relating to borrowings after this date in the amount of Tenge 8,924,392 thousand. During 2015, the Company received Tenge 1,867,551 thousand under the third tranche in accordance with addendums No. 22 and No. 23 dated 24 August 2015 and 8 September 2015, accordingly. During 2020, the amount of loan payments was Tenge 3,508,415 thousand (2019: Tenge 3,449,546 thousand).

The loans are secured as follows:

- Government guarantee of the Ministry of Finance of the Republic of Kazakhstan of US Dollars 25,000,000. Uncovered counter-guarantee for the guarantee of the Ministry of Finance of the Republic of Kazakhstan Halyk Savings Bank of Kazakhstan JSC for US Dollars 2,304,331;
- Guarantee of Samruk-Energy JSC for Tenge 1,079,213 thousand dated 13 December 2012;
- Guarantee of Samruk-Kazyna National Welfare Fund JSC for Tenge 12,285,000 thousand dated 1 July 2011;
- Guarantee of Samruk-Energy JSC for Tenge 4,545,554 thousand dated 28 November 2019;
- Property, plant and equipment with a carrying amount of Tenge 6,036,147 thousand (2019: Tenge 6,172,543 thousand)

18 Borrowings (continued)

Shardara HPS JSC

European Bank of Reconstruction and Development

On 24 August 2012 the Shardara HPS JSC (“SHPS”) entered into loan agreement with the European Bank of Reconstruction and Development (“EBRD”) on loan in the amount of Tenge 9,150,000 thousand. On 28 February 2014 the amount of the agreement increased to Tenge 14,350,000 thousand (tranche No.1). The funds under tranche No. 1 were received in full during 2015-2017. On 18 April 2019, addendum No. 7 was signed on the provision of tranche No. 2, for an amount of up to Tenge 11,520,000 thousand, the Company received funds in full in May 2019. The principal amount on tranche No. 1 is repayable in 40 equal quarterly instalments. The first payment date is the 3rd quarter of 2018, the last payment date is the 2nd quarter of 2028. The principal amount under tranche No. 2 is repayable in 33 equal quarterly instalments. The first payment date is the 2nd quarter of 2020, the last payment date is the 2nd quarter of 2028. Interest is payable quarterly, other commissions are payable upon receipt of the invoice.

Ekibastuz GRES-1

Sberbank JSC SB

In August 2017, the Company opened two non-revolving credit facilities in Sberbank of Russia JSC SB under which the following loans were received:

- Tenge 7,000,000 thousand for 5 years, until 29 August 2022.
- Tenge 21,000,000 thousand for 3 years, until 29 August 2020, with the possibility of extension until 29 August 2022.

During 2020, debt principal of Tenge 5,700,000 thousand was repaid, including Tenge 3,500,000 thousand pursuant to repayment schedule and Tenge 2,200,000 thousand pre-termly, and interest of Tenge 1,851,500 thousand. Interest rate on this loan is 11.5% per annum. In August 2020, an addendum was executed with Sberbank JSC SB on prolongation of the repayment of principal debt of Tenge 10,500,000 thousand until 29 September 2021.

Halyk Bank of Kazakhstan JSC

In April 2015, the Company entered into a loan agreement with Halyk Bank of Kazakhstan JSC. The total limit was Tenge 43,000,000 thousand, including:

- Limit 1 - Tenge 35,000,000 thousand on a non-renewable basis for 5 years (until 7 April 2021 - tranche terms until the end of financing);
- Limit 2 - Tenge 8,000,000 thousand on a renewable basis (3 years - tranche terms up to 12 months inclusive).

On 17 May 2019, an addendum No. 10 to bank loan agreements was signed. The purpose of the addendum is to reduce the interest rate up to 6 months (inclusive) – 10.3%, up to 9 months (inclusive) – 10.5%, up to 12 months (inclusive) -10.75% and up to 36 months (inclusive) – 11.25% per annum.

On 3 June 2019, an addendum No. 11 to bank loan agreements was signed. The purpose of the addendum is to increase the renewable part of the credit facility to Tenge 28,000,000 thousand with a validity period of up to 31 December 2024.

Within the credit facility agreement No.KS 01-15-06 dated 8 April 2015, in June 2020 an addendum No.17 to bank loan agreements was signed with Halyk Bank of Kazakhstan JSC. The purpose of the addendum is to increase the renewable part of the credit facility to Tenge 38,000,000 thousand (inclusive) with a validity period of up to 31 December 2024.

In March 2020, an addendum No.14 to bank loan agreements was signed. The purpose of the addendum is to decrease interest rate to 12 months (inclusive) – 12.5%, over 12 months (inclusive) – 13.5% per annum. In April 2020, an addendum No.15 to bank loan agreements was signed. The purpose of the addendum is to decrease interest rate to 6 month (inclusive) – 11%, over 12 months (inclusive) – 11.5% per annum.

In August 2020, an addendum No.18 to bank loan agreements was signed. The purpose of the addendum is to decrease interest rate to 6 month (inclusive) – 10.5%, over 12 months (inclusive) – 11%, for a period of 36 months – 11.5% per annum.

18 Borrowings (continued)

During 2020, the Company repaid its loan indebtedness in the amount of Tenge 25,000,000 thousand. As of 31 December 2020, loans from Halyk Bank of Kazakhstan JSC represent loans received within the revolving credit facility with a maturity of 1 year.

AlmatyEnergoSbyt

Halyk Bank of Kazakhstan JSC

AlmatyEnergoSbyt LLP has opened a short-term credit facility at Halyk Bank of Kazakhstan JSC to replenish working capital since 22 April 2015. Under this credit facility, the Company received loans for Tenge 8,300,000 thousand in 2020. During 2020, interest rate in Tenge was reduced from 12.5% to 11.0% per annum. Loans were provided to replenish working capital.

19 Other Non-Current Liabilities

<i>In thousands of Kazakhstani Tenge</i>	31 December 2020	31 December 2019
Historical costs associated with obtaining subsoil use rights	1,704,370	1,914,756
Trade payables	1,470,769	1,216,356
Total financial non-current liabilities	3,175,139	3,131,112
Deferred income	591,994	995,311
Other	185,017	204,953
Total other non-current liabilities	3,952,150	4,331,376

Trade payables of Tenge 1,470,769 thousand represent the Group's non-current payables to contractors for the modernisation of Shardara HPS (2019: Tenge 1,216,356 thousand). These payables are fully denominated in Euro at 31 December 2020 and 31 December 2019.

Deferred income represents the difference between the nominal value of loans from AZhK customers for construction and reconstruction of new and existing power transmission lines and infrastructure to connect to electricity transmission lines and the fair value of these loans at initial recognition. The associated deferred income is subsequently recognised in profit or loss over the useful lives of property, plant and equipment.

In the context of the Group's current structure, tax losses and current tax assets of different companies of the Group cannot be offset with the current tax liabilities and tax benefits of other companies of the Group, and accordingly, taxes can be charged even in case of consolidated tax loss. Therefore, deferred income tax assets and liabilities are offset only if they are related to the same taxable company.

The Group has potential deferred tax assets in respect of unused tax losses carry forwards. The above tax losses carry forwards expire in 2027.

The Group did not recognise deferred tax liabilities in 2020 (2019: no deferred tax liabilities) in respect of temporary differences associated with investments in joint ventures as the Group is able to control the timing of the reversal of those temporary differences and does not intend to reverse them in the foreseeable future.

29 Contingencies, Commitments and Operating Risks

Political and economic situation in the Republic of Kazakhstan

In general, the economy of the Republic of Kazakhstan continues to display characteristics of an emerging market. Its economy is particularly sensitive to prices on oil and gas prices and other commodities, which constitute major part of the country's export. These characteristics include, but are not limited to, the existence of national currency that is not freely convertible outside of the country and a low level of liquidity of debt and equity securities in the markets. Ongoing political tension in the region, volatility of exchange rate have caused and may continue to cause negative impact on the economy of the Republic of Kazakhstan, including decrease in liquidity and creation of difficulties in attracting of international financing.

On 20 August 2015 the National Bank and the Government of the Republic of Kazakhstan made a resolution about discontinuation of supporting the exchange rate of Tenge and implement of new monetary policy, which is based on inflation targeting regime, cancellation of exchange rate trading band and start a free floating exchange rate. However, the National Bank's exchange rate policy allows it to intervene to prevent dramatic fluctuations of the Tenge exchange rate and to ensure financial stability.

As at the date of this report the official exchange rate of the National Bank of the Republic Kazakhstan was Tenge 414.77 per US Dollar 1, compared to Tenge 420.91 per US Dollar 1 at 31 December 2020 (31 December 2019: Tenge 381.18 per US Dollar 1). Therefore, uncertainty remains in relation to exchange rate of Tenge and future action of National Bank and the Government of the Republic of Kazakhstan and the impact of these factors on the economy of the Republic of Kazakhstan.

On 21 August 2020, Fitch Ratings affirmed the long-term foreign currency issuer default rating ("IDR") of Kazakhstan – "BBB" with a stable outlook. Kazakhstan's 'BBB' IDRs balance large fiscal and external buffers, underpinned by accumulated oil-related fiscal revenues and a strong sovereign net foreign asset position, against high commodity dependence, a weak banking sector relative to peers, and lower governance scores than 'BBB' medians. Public debt remains low and external and fiscal buffers robust despite the oil price and coronavirus shocks.

According to the official estimates, real GDP during the nine months of 2020 contracted by 3.1%. In August 2020 Fitch forecasted that real GDP would contract by 2.0% in 2020 (2019: +4.5%) as coronavirus containment measures hit domestic demand, and OPEC+ oil production cuts affect net exports.

Additionally, the power energy sector in the Republic of Kazakhstan is still impacted by political, legislative, fiscal and regulatory developments. The prospects for future economic stability in the Republic of Kazakhstan are largely dependent upon the effectiveness of economic measures undertaken by the Government, together with legal, controlling and political developments, which are beyond the Group's control.

For the purpose of measurement of expected credit losses ("ECL") the Group uses supportable forward-looking information, including forecasts of macroeconomic variables. As with any economic forecast, however, the projections and likelihoods of their occurrence are subject to a high degree of inherent uncertainty and therefore the actual outcomes may be significantly different from those projected.

In December 2019, news from China about the outbreak of a new virus first appeared. On 11 March 2020, the World Health Organization announced an outbreak of a new type of coronavirus, COVID19, as a pandemic. According to the decree of the President of the Republic of Kazakhstan dated 15 March 2020 No. 285 "On the introduction of a state of emergency in the Republic of Kazakhstan," a state of emergency was introduced in the country for the period from 16 March 2020 until 11 May 2020.

Most of the cities of Kazakhstan fell under the quarantine regime, and in the period from 30 March to 11 May this year, the operations of most industrial enterprises were suspended. The Group's activities for the period of quarantine were not suspended, the work of office employees was organized remotely.

In response to the pandemic Kazakhstan authorities take numerous actions aimed at the containment of COVID-19 spread and impact, such as bans on travelling, quarantine, business activities restrictions, etc. These actions, amongst others, significantly restrict economic activity in Kazakhstan, as well as they have and may continue to have a negative impact on businesses, market participants and Group's clients, as well as Kazakhstan and world economy for an uncertain time period.

At the same time, on 9 March 2020, oil quotes collapsed amid the disagreements of the OPEC members, the price of Brent crude oil in March this year fell below US Dollars 25 per barrel. The Tenge depreciated against the US Dollar since the beginning of 2020 by approximately 10%.

29 Contingencies, Commitments and Operating Risks (continued)

As of the date of the issuance of these consolidated financial statements, the cost of Brent oil was US Dollars 51.80 per barrel with further forecasted increase in price.

As of the date of the issuance of these consolidated financial statements, the situation is still developing, and to date there has not been any significant effect on the Group's revenues and deliveries.

The power energy generation volume in the Group in 2020 was 31.4 billion kWh that is above the plan by 3% and actual value for the previous year by 4%. The main factor of the increase in generation volume by last year is power energy consumption growth in the north and south of RK by 2.3%. Also, the Group's share in power energy generation in RK upon 2020 actual value was 29% that is higher by 2% than last year indicator.

Revenue in 2020 amounted to Tenge 283 billion that is higher than in the last year by 16%. EBITDA index of the Group was Tenge 99,7 billion that is higher than the last year actual value by 21%. The main driver of the growth of revenue and EBITDA compared to the last year is increase in power energy tariffs and generation volumes.

However, the future effect is difficult to predict. Management will continue to monitor the potential effect of the above events and will take all necessary actions to prevent negative consequences for the business, however:

- the consequences of downtime/quarantine due to the COVID-19 pandemic will lead to a slowdown in business activity in general, which may affect the Company's financial performance in the future;
- as part of new agreements between OPEC members and other oil-producing countries, Kazakhstan and Russia have committed to cut production levels;
- further depreciation of Tenge against the US dollar will negatively affect the financial results of the Group.

In addition, the following event occurred that caused a positive impact on the Group's financial stability:

- approval by the Order of the ME RK No.205 dated 22 May 2020 of estimation methodology for the fixed profit accounted for in power energy tariff effective from 2021 that will enable, apart from full cost coverage, getting profitability from the sales of electricity by operating energy-producing organizations;

Management is unable to predict the extent or duration of changes in the Kazakhstani economy or evaluate their possible impact on the financial position of the Group in the future. Management believes that it is taking all necessary actions to maintain the sustainability and growth of the Group in current circumstances.

Tax legislation

Kazakhstani tax legislation and practice is in a state of continuous development and therefore is subject to varying interpretations and frequent changes, which may be retroactive. In some cases, in order to determine the taxable base, the tax law refers to the provisions of IFRS, and the interpretation of the relevant provisions of IFRS by Kazakhstani tax authorities may differ from the accounting policies, judgments and estimates applied by management in the preparation of these consolidated financial statements, which may lead to additional tax liabilities of the Group. Fiscal periods remain open to review by the authorities in respect of taxes for five years after the end of the fiscal year.

The Group management believes that its interpretation of the relevant legislation is appropriate and the Group's tax positions will be sustained. In the opinion of the Group management, no material losses will be incurred in respect of existing and potential tax claims in excess of provision that have been made in these consolidated financial statements.

Legal proceedings

Legal proceedings between EGRES-1 and Maikuben-West Holding JSC

Since 2016, the Company has been involved in legal proceedings with Maikuben-West Holding (Member of Maikuben-West LLP). The Company filed a lawsuit in the specialized inter-district economic court ("SIEC") of Pavlodar region for collection of debt of Tenge 333 million tenge from Maikuben-West LLP, as well as a government fee of Tenge 10 million. By the decision of the SIEC of Pavlodar region dated 10 June 2016 the claim has been successful. Part of debt in the amount of Tenge 28 million was recovered from Maikuben-West LLP. As to the remaining debt of Maikuben-West LLP of Tenge 315 million, the following measures were taken: seizure of funds and property of Maikuben-West LLP, recommendations were sent to the SIEC of Pavlodar region to suspend licenses and permits issued by Maikuben LLP -West.

29 Contingencies, Commitments and Operating Risks (continued)

In the period from 15 July 2019 to 22 February 2020, in connection with the lawsuit filed by Maikuben-West LLP on the application of the rehabilitation procedure, enforcement proceedings were suspended.

In 2019, the Company filed a lawsuit against the debt collection with Maikuben-West LLP of Tenge 1,632,148 thousand, lost profit Tenge 161,286 thousand, forfeit (penalty) Tenge 99,302 thousand and government fee Tenge 47,538 thousand.

On 11 June 2019, the SIEC of Pavlodar region made a decision to approve the Company's claim in full. On 3 December 2019, enforcement proceedings were initiated to collect debts from Maikuben-West LLP of Tenge 1,6 billion.

Due to ongoing legal proceedings between the parties, the receivables of Maikuben-West LLP as of 31 December 2020 were fully impaired (31 December 2019: fully impaired).

Legal proceedings between Samruk-Energy JSC and Transtelecom JSC

For the second quarter of 2020, the Company is involved in legal proceedings with Transtelecom JSC. Transtelecom JSC took legal actions for the recovery of actually rendered services and incurred expenses under Procurement Contract "Consulting services on implementation of target (base) processes of Samruk-Energy JSC" of Tenge 1,100,045 thousand. On 16 April 2020, preparation was held to legal proceeding in Nur-Sultan SIEC. On 3 August 2020, legal proceedings were held in Nur-Sultan SIEC on a civil case under Transtelecom JSC's claim to Samruk-Energy JSC on recovery of debt amount. According to court ruling dated 3 August 2020 and 25 August 2020 on this case, legal economic evaluation and legal merchandising expert review have been assigned. On 15 December 2020, court made a decision of partial satisfaction. The court decided to recover from Samruk-Energy JSC in favour of Transtelecom JSC the amount of Tenge 718,254 thousand and judicial costs on state duty payment of Tenge 21,548 thousand. The court denied the remaining portion of Transtelecom JSC's demand for Tenge 381,791 thousand. The Company created provision for the amount of Tenge 739,802 within general and administrative expenses as of 31 December 2020. On 3 February 2021, the court approved mediation agreement executed between Samruk-Energy JSC and Transtelecom JSC dated 2 February 2021, according to which Samruk-Energy JSC on 8 February 2021 repaid the amount for actually performed works of Tenge 700,000 thousand. As of the approval date of these consolidated financial statements an agreement between Samruk-Energy JSC and Transtelecom JSC was executed.

Insurance

The insurance industry in the Republic of Kazakhstan is in a developing stage and many forms of insurance protection common in other parts of the world are not yet generally available in the Republic of Kazakhstan. The Group does not have full coverage for its plant facilities, losses caused by business interruptions or third party liabilities in respect of property or environmental damage arising from accidents or the Group's activities. Until the Group obtains adequate insurance coverage, there is a risk that the loss or destruction of certain assets could have a material adverse effect on the Group's operations and financial position.

Environmental matters

The enforcement of environmental regulation in the Republic of Kazakhstan is evolving and the enforcement posture of government authorities of the Republic of Kazakhstan is continually being reconsidered. The Group periodically evaluates its environmental commitments. As obligations are determined, they are recognised immediately in the consolidated financial statements. Potential obligations, which can arise as a result of changes to effective regulations, as a result of a civil action or per legislation, cannot be estimated but can be material. However, per the current interpretation of the current legislation, management believes that the Group does not have material obligations in addition to the amounts already accrued and recorded in these consolidated financial statements, which would have a material adverse effect on the operating results or the financial position of the Group.

On 2 January 2021, the President of RK signed new Environmental Code of the Republic of Kazakhstan, effective from 1 July 2021. According to the new Environmental Code from 2025 TOP-50 entities voluntarily transit to Complex Ecological Permits ("CEP"). TOP-50 entities included AES JSC and EGRES-1. This document requires from entities the implementation of the best available technologies ("BAT") and compliance with emission norms typical for BAT. BAT lists shall be developed by the authorised environmental protection body until 1 July 2023. The whole process of entities transition to CEP is voluntary, however if an entity decides to transit to CEP, then as an expansionary measure it is exempt from emission payments, and if it refuses, then emission payments increase 2 times from 2025, 4 times from 2028, 8 times from 2031. Currently, the Group assesses, how new Environmental Code of RK impacts the Group's operations.

29 Contingencies, Commitments and Operating Risks (continued)

Ash dump liquidation provision

In accordance with nature protection legislation, the Group is legally obliged to liquidate ash dump sites representing landfill sites for the Group's operating activities. As of 31 December 2020, the carrying amount of ash dump liquidation provision was Tenge 3,423,974 thousand (31 December 2019: Tenge 2,331,591 thousand). The assessment of the current ash dump liquidation provision is based on the Group's interpretation of the environmental legislation of RK in force, supported by feasibility study and engineering research in accordance with current norms of restoration methods and reclamation works. This assessment may change upon completion of subsequent nature protection research works and review of existing reclamation and restoration programmes.

Capital expenditure commitments

The Group has analysed its exposure to seasonal and other arising business risks, but did not determine any risks, which could have impact on financial indicators or position of the Group as of 31 December 2020. The Group has relevant funds and financing sources to implement capital expenditure commitments and maintain working capital.

As of 31 December 2020, the Group had contractual commitments on acquisition of property, plant and equipment totalling Tenge 76,074,066 thousand (31 December 2019: Tenge 160,605,255 thousand).

Capital expenditure commitments of joint ventures and associates

As of 31 December 2020, the Group's share in non-current contractual commitments of Forum Muider and SEGRES-2 liabilities was Tenge 13,800,248 thousand and Tenge 13,198,220 thousand accordingly (31 December 2019: Tenge 16,748,835 thousand and Tenge 23,937,977 thousand accordingly).

Modernisation of Almaty CHP-2 with the minimization of the environmental impact

In 2020, project on modernisation of Almaty CHP-3 with the minimisation of the environmental impact was included in the road map on comprehensive settlement of ecological problems of Nur-Sultan and Almaty cities. According to the roadmap, Samruk Energy, Ministry of Energy, Akimats of Almaty city and Almaty Oblast should develop feasibility study for the project to make decision regarding the implementation of project on decrease in emissions from CHP-3 and agree it with the authorized body by 31 December 2021.

Borrowing covenants

The Group is subject to certain covenants related primarily to its borrowings. Non-compliance with such covenants may result in negative consequences for the Group including growth in the cost of borrowings and declaration of default. Upon the results of 2020, the Group was in compliance with covenants on borrowings, and received waivers on reduction of thresholds, when a violation forecasted.

30 Non-controlling Interest

The following table provides information about each subsidiary that has non-controlling interest that is material to the Group.

<i>In thousands of Kazakhstani Tenge</i>	Place of business (and country of incorporation if different)	Proportion of non- controlling interest	Proportion of non- controlling interest's voting rights held	Profit or loss attributable to non- controlling interest	Accumulated non-control- ling interest in the subsidiary	Dividends paid to non- controlling interest during the year

32 Financial Risk Management

Financial risk factors

The Group's activities expose it to a variety of financial risks: market risk (including currency risk, interest rate risk), credit risk and liquidity risk. The Group's overall risk management programme focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the Group's financial performance. The Group does not use derivative financial instruments to hedge risk exposures.

Risk management is carried out by management under policies set by the Group's ultimate parent (Note 1), which provides principles for risk management, covering specific areas, such as credit risk, liquidity risk, and market risk.

(a) Credit risk

The Group exposes itself to credit risk, which is the risk that one party to a financial instrument will cause a financial loss for the other party by failing to meet an obligation.

Exposure to credit risk arises as a result of the Group's lending and other transactions with counterparties, giving rise to financial assets.

The Group's maximum exposure to credit risk is reflected in the carrying amounts of financial assets in the consolidated statement of financial position.

Credit risk management

Credit risk is the single largest risk for the Group's business; management therefore carefully manages its exposure to credit risk.

The estimation of credit risk for risk management purposes is complex and involves the use of models, as the risk varies depending on market conditions, expected cash flows and the passage of time. The assessment of credit risk for a portfolio of assets entails further estimations of the likelihood of defaults occurring, the associated loss ratios and default correlations between counterparties.

Credit risk grading system

For measuring credit risk and grading financial instruments by the amount of credit risk, the Group applies two approaches – an Internal Risk-Based (IRB) rating system or risk grades estimated by external international rating agencies (Standard & Poor's – "S&P", Fitch, Moody's). Internal and external credit ratings are mapped on an internally defined master scale with a specified range of probabilities of default. The IRB system is designed internally, and ratings are estimated by management. Various credit-risk estimation techniques are used by the Group depending on the class of the asset.

The Group applies IRB systems for measuring credit risk for non-current receivables.

The rating models are regularly reviewed, backtested on actual default data and updated, if necessary. Despite the method used, the Group regularly validates the accuracy of ratings estimates and appraises the predictive power of the models.

External ratings are assigned to counterparties by independent international rating agencies, such as S&P, Moody's and Fitch. These ratings are publicly available. Such ratings and the corresponding range of probabilities of default ("PD") are applied for all financial assets other than trade receivables and non-current receivables

Expected credit loss (ECL) measurement

ECL is a probability-weighted estimate of the present value of future cash shortfalls (i.e., the weighted average of credit losses, with the respective risks of default occurring in a given time period used as weights). An ECL measurement is unbiased and is determined by evaluating a range of possible outcomes. ECL measurement is based on four components used by the Group: Probability of Default ("PD"), Exposure at Default ("EAD"), Loss Given Default ("LGD") and Discount Rate.

32 Financial Risk Management (continued)

EAD is an estimate of exposure at a future default date, taking into account expected changes in the exposure after the reporting period, including repayments of principal and interest, and expected drawdowns on committed facilities. The EAD on credit related commitments is estimated using Credit Conversion Factor (“CCF”). CCF is a coefficient that shows the probability of conversion of the commitment amounts to an on-balance sheet exposure within a defined period. PD is an estimate of the likelihood of default to occur over a given time period. LGD is an estimate of the loss arising on default. It is based on the difference between the contractual cash flows due and those that the lender would expect to receive, including from any collateral. It is usually expressed as a percentage of the EAD. The expected losses are discounted to present value at the end of the reporting period. The discount rate represents the effective interest rate (“EIR”) for the financial instrument or an approximation thereof.

Expected credit losses are modelled over instrument’s *lifetime period*. The *lifetime period* is equal to the remaining contractual period to maturity of debt instruments, adjusted for expected prepayments, if any.

Management models *Lifetime ECL*, that is, losses that result from all possible default events over the remaining lifetime period of the financial instrument. The *12-month ECL*, represents a portion of lifetime ECLs that result from default events on a financial instrument that are possible within 12 months after the reporting period, or remaining *lifetime period* of the financial instrument if it is less than a year.

The ECLs that are estimated by management for the purposes of these financial statements are point-in-time estimates, rather than through-the-cycle estimates that are commonly used for regulatory purposes. The estimates consider *forward looking information*, that is, ECLs reflect probability weighted development of key macroeconomic variables that have an impact on credit risk.

The ECL modelling does not differ for Purchased or Originated Credit Impaired (“POCI”) financial assets, except that (a) gross carrying value and discount rate are based on cash flows that were recoverable at initial recognition of the asset, rather than based on contractual cash flows, and (b) the ECL is always a lifetime ECL. POCI assets are financial assets that are credit-impaired upon initial recognition, such as impaired loans acquired in a past business combination.

For purposes of measuring PD, the Group defines default as a situation when the exposure meets one or more of the following criteria:

- the borrower is more than 90 days past due on its contractual payments;
- international rating agencies have classified the borrower in the default rating class;
- the borrower meets the unlikelihood-to-pay criteria listed below:
 - suspending accrual of interest/reduction in the interest rate on a financial asset;
 - writing-off the principal amount;
 - sales of a financial asset at a significant discount to its nominal value;
 - restructuring that will result in reduction in/write-off of the loan/debt release;
 - increase in the maturity of a financial asset;
 - granting of indulgence on the principal/interests;
 - filing a bankruptcy claim against the counterparty in line with the legislation of the Republic of Kazakhstan;
 - bankruptcy claim filed by the counterparty;
 - liabilities covered by the guarantee agreement or payment under the guarantee agreement are past due more than 90 days.

For purposes of disclosure, the Group fully aligned the definition of default with the definition of credit-impaired assets. The default definition stated above is applied to all types of financial assets of the Group.

An instrument is considered to no longer be in default (i.e. to have cured) when it no longer meets any of the default criteria for a consecutive period of three months. This period of three months has been determined based on an analysis that considers the likelihood of a financial instrument returning to default status after curing by using different possible definitions of cures.

The assessment whether or not there has been a significant increase in credit risk (“SICR”) since initial recognition is performed on an individual basis and on a portfolio basis.

32 Financial Risk Management (continued)

The level of ECL that is recognised in these consolidated financial statements depends on whether the credit risk of the borrower has increased significantly since initial recognition. This is a three-stage model for ECL measurement.

A financial instrument that is not credit-impaired on initial recognition and its credit risk has not increased significantly since initial recognition has a credit loss allowance based on 12-month ECLs (Stage 1).

If a SICR since initial recognition is identified, the financial instrument is moved to Stage 2 but is not yet deemed to be credit-impaired and the loss allowance is based on lifetime ECLs. If a financial instrument is credit-impaired, the financial instrument is moved to Stage 3 and loss allowance is based on lifetime ECLs. The consequence of an asset being in Stage 3 is that the entity ceases to recognise interest income based on gross carrying value and applies the asset's effective interest rate to the carrying amount, net of ECL, when calculating interest income.

If there is evidence that the SICR criteria are no longer met, the instrument is transferred back to Stage 1. If an exposure has been transferred to Stage 2 based on a qualitative indicator, the Group monitors whether that indicator continues to exist or has changed.

ECL for POCI financial assets is always measured on a lifetime basis. The Group therefore only recognises the cumulative changes in lifetime expected credit losses

The table below classifies financial assets, such as other long-term receivables and bonds and loans given carried at amortised cost, by separate stage of impairment models. ECL provisions of other financial assets is insignificant as at 31 December 2020.

In thousands of Kazakhstani Tenge	ECL allowance			Total	Gross carrying amount			Total
	Stage 1 (12- months ECL)	Stage 2 (lifetime ECL for SICR)	Stage 3 (lifetime ECL for credit impaired)		Stage 1 (12-months ECL)	Stage 2 (lifetime ECL for SICR)	Stage 3 (lifetime ECL for credit impaired)	
Other receivables At 1 January 2020	(99,893)	-	(137,906)	(237,799)	10,686,603	-	1,038,725	11,725,328

At 31 December 2019	(99,893)	-	(137,906)	(237,799)	10,686,603	-	1,038,725	11,725,328

32 Financial Risk Management (continued)

The Group has three approaches for ECL measurement: (i) assessment on an individual basis; (ii) assessment on a portfolio basis: internal ratings are estimated on an individual basis but the same credit risk parameters (e.g. PD, LGD) will be applied during the process of ECL calculations for the same credit risk ratings and homogeneous segments of the loan portfolio; and (iii) assessment based on external ratings.

In general, ECL is the sum of the multiplications of the following credit risk parameters: EAD, PD and LGD, that are defined as explained above, and discounted to present value using the instrument's effective interest rate. The ECL is determined by predicting credit risk parameters (EAD, PD and LGD) for each future month during the lifetime period for each individual exposure or collective segment. These three components are multiplied together and adjusted for the likelihood of survival (i.e. the exposure has been repaid or defaulted in an earlier month). This effectively calculates an ECL for each future period, that is then discounted back to the reporting date and summed up. The discount rate used in the ECL calculation is the original effective interest rate or an approximation thereof.

The table below summarises external (if any) and internal credit ratings at the end of the relevant reporting period:

<i>In thousands of Kazakhstani Tenge</i>	Cash	Restricted cash	Term deposits	Bonds and loans

The Group applies the provision matrix for calculation of ECL on trade receivables. To measure the expected credit losses, trade and other receivables have been grouped based on shared credit risk characteristics and the overdue days.

32 Financial Risk Management (continued)

The levels of default and calculation of loss allowance at the end of the relevant reporting period were as follows:

<i>In thousands of Kazakhstani Tenge</i>	Trade receivables from legal entities

Total	18,353,892

Forward-looking information incorporated in the ECL models

The assessment of SICR and the calculation of ECLs both incorporate supportable forward-looking information. The Group identified certain key economic variables that correlate with developments in credit risk and ECLs: GDP, inflation, exchange rate, oil price, and short-term economic indicator used for description of the economic development trend based on changes in the performance of primary sectors.

The impact of the relevant economic variables on the PD, EAD and LGD has been determined by performing statistical regression analysis to understand the impact that the changes in these variables historically had on the default rates and on the components of LGD and EAD.

As with any economic forecast, the projections and likelihoods of occurrence are subject to a high degree of inherent uncertainty, and therefore the actual outcomes may be significantly different to those projected.

The Group regularly reviews its methodology and assumptions to reduce any difference between the estimates and the actual loss of credit. Such backtesting is performed at least once a year.

The results of backtesting the ECL measurement methodology are communicated to Group Management and further steps for tuning models and assumptions are defined after discussions between authorised persons.

(b) Liquidity risk

Liquidity risk is the risk that an entity will encounter difficulty in meeting obligations associated with financial liabilities. In accordance with the Group policy on formation and monitoring of development plans the Group manages the liquidity risk using short-term (one month) forecasts and also mid-term forecast for the next five years. In addition, the Group develops and approves development strategy of the Group for the next ten years. In planning cash flows, the Group also accounts for income from temporary excess cash using the bank deposits.

The table below analyses the Group's financial liabilities into relevant maturity groupings based on the remaining period at the end of the reporting period to the contractual maturity date. The amounts disclosed in the maturity table are the contractual undiscounted cash flows, including future payment of interest and principal.

32 Financial Risk Management (continued)

<i>In thousands of Kazakhstani Tenge</i>	Demand and less than 1 month	From 1 to 3 months	From 3 to 12 months	From 12 months to 5 years	Over 5 years

(c) Market risk

The Group takes on exposure to market risks. Market risks arise from open positions in (a) currency, (b) interest rates and (c) equity products, all of which are exposed to general and specific market movements.

Currency risk

The Group's certain borrowings (Note 18) and trade payables (Note 20) are denominated in foreign currencies (US dollars and Euro) and hence the Group is exposed to foreign exchange risk. Due to the fact that the variety of financial derivative instruments on the Kazakhstani market is limited and those instruments are rather expensive the management chooses at the moment not to hedge the Group's foreign exchange risk, as currently the benefits from implementing such instruments do not outweigh the costs. Nevertheless, the Group continues monitoring changes of financial derivatives market in order to implement hedging structure in the future or as needed.

The table below shows the total amount of foreign currency denominated liabilities that give rise to foreign exchange exposure:

<i>In thousands of Kazakhstani Tenge</i>	USD	Euro	Rouble	Total
At 31 December 2020				
Assets	2,487,283	1,470,898	5	3,958,186
Liabilities	(6,818,729)	(1,476,808)	-	(8,295,537)
Net position	(4,331,446)	(5,910)	5	(4,337,351)
At 31 December 2019				
Assets	2,361,220	4,193,606	6	6,554,832
Liabilities	(5,786,731)	(3,760,897)	(214)	(9,547,842)
Net position	(3,425,511)	432,709	(208)	(2,993,010)

32 Financial Risk Management (continued)

The following table presents sensitivities of profit or loss and equity to reasonably possible changes in exchange rates applied at the end of the reporting period relative to the functional currency of the respective Group entities, with all other variables held constant.

<i>In thousands of Kazakhstani Tenge</i>	Impact on profit or loss	
	At 31 December 2020	At 31 December 2019
US Dollar strengthening by 14% (2019: strengthening by 12%)	(485,122)	(328,849)
US Dollar weakening by 11% (2019: weakening by 9%)	381,167	246,637
Euro strengthening by 14% (2019: strengthening by 12%)	(662)	41,540
Euro weakening by 11% (2019: weakening by 9%)	520	(31,155)
Rouble strengthening by 15% (2019: strengthening by 12%)	1	(171,633)
Rouble weakening by 15% (2019: weakening by 12%)	(1)	445,820

In general, the Group is not exposed to significant currency risks and is not subject to negative changes in Tenge rate volatility, as financial liabilities in foreign currency account for 2% of all liabilities at 31 December 2020. Currency risks were minimised in previous periods by refinancing foreign currency loans, and at 31 December 2020 the Group has only one loan in foreign currency from the Development Bank of Kazakhstan in US Dollars, the carrying amount of which was Tenge 4,860,113 thousand at 31 December 2020.

Interest rate risk

The Group takes on exposure to the effects of fluctuations in the prevailing levels of market interest rates on its financial position and cash flows.

Interest rate risk arises from long-term and short-term borrowings. The Group is exposed to potential market risk of LIBOR quotas at London Stock Exchange and All-in-Cost (total bank costs, taking into account the inflation rate in the

Republic of Kazakhstan and other bank charges). Increase in LIBOR and All-in-Cost would have an adverse effect on the Group's cash flows. The Group carefully monitors changes in floating interest rates.

If at 31 December 2020, interest rates had been 20 basis points higher/less, with all other variables held constant, profit for the year would have been Tenge 97,202 thousand less/higher, mainly as a result of higher/lower interest expense on floating interest rate liabilities (31 December 2019: Tenge 387,190 thousand).

Management of capital

The Group's objectives when managing capital are to safeguard the Group's ability to continue as a going concern in order to provide returns for shareholders and benefits for other stakeholders and to maintain an optimal capital structure to reduce the cost of capital. In order to maintain or adjust the capital structure, the Group may adjust the amount of dividends paid to shareholders, return capital to shareholders, or sell assets to reduce debt. Consistent with others in the industry, the Group monitors capital on the basis of the gearing ratio. This ratio is calculated as net debt divided by total capital. Net debt is calculated as total borrowings (including current and non-current borrowings as shown in the consolidated statement of financial position) less cash and cash equivalents. Total capital is calculated as equity as shown in the consolidated statement of financial position plus net debt. Management considers the current gearing ratio of 50% as acceptable for the risk profile of the Group.

32 Financial Risk Management (continued)

<i>In thousands of Kazakhstani Tenge</i>	Note	31 December 2020	31 December 2019

Total capital		744,634,934	742,949,016
Gearing ratio		34%	35%

33 Fair Value Disclosures

Fair value measurement

To be indicative of the reliability of the data used in determining fair value, the Group classifies its financial instruments at three levels established in accordance with IFRS. Fair value measurements are analysed by level in the fair value hierarchy as follows: (i) level one are measurements at quoted prices (unadjusted) in active markets for identical assets or liabilities, (ii) level two measurements are valuations techniques with all material inputs observable for the asset or liability, either directly or indirectly (that is, as prices), and (iii) level three measurements are valuations not based on observable market data (that is, unobservable inputs). Management applies judgement in categorising financial instruments using the fair value hierarchy. If a fair value measurement uses observable inputs that require significant adjustment, that measurement is a Level 3 measurement. The significance of a valuation input is assessed against the fair value measurement in its entirety. Fair values analysed by level in the fair value hierarchy and the carrying value of assets and liabilities not measured at fair value are as follows:

<i>In thousands of Kazakhstani Tenge</i>	31 December 2020				31 December 2019			
	Level 1	Level 2	Level 3	Carrying amount	Level 1	Level 2	Level 3	Carrying amount

Financial assets carried at amortised cost

The estimated fair value of fixed interest rate instruments is based on estimated future cash flows expected to be received discounted at current interest rates for new instruments with similar credit risks and remaining maturities. Discount rates used depend on the credit risk of the counterparty.

Liabilities carried at amortised cost

The estimated fair value of fixed interest rate instruments is based on estimated future cash flows expected to be received discounted at current interest rates for new instruments with similar credit risks and remaining maturities.

Fair value of investment property

Investment property include the lease agreement of Bukhtarminskaya HPS evaluated based on the present value of future lease payments. Fair value of the investment property is Tenge 4,744,719 thousand (2019: 7,060,789 thousand).

34 Events after the Reporting Period

On 25 January 2021 under Tranche 2 of the Loan Agreement No.48308 dated 9 December 2016 with the EBRD, the Samruk-Energy JSC made scheduled repayments for the total of Tenge 1,986,194 thousand, including the principal amount of Tenge 1,521,118 thousand, interest of Tenge 465,076 thousand and pre-term principal debt repayment for Tenge 2,538,200 thousand.

35 Earnings per Share and Carrying Amount of one Share

Basic earnings per share are calculated by dividing the profit or loss attributable to owners of the Company by the weighted average number of ordinary shares in issue during the year. The Company has no dilutive potential ordinary shares; therefore, the diluted earnings per share equals the basic earnings per share.

<i>In thousands of Kazakhstani Tenge</i>	2020	2019
Profit for the year attributable to the Group's owners (in thousands of Kazakhstani Tenge)	8,007,623	6,834,875
Weighted average number of ordinary shares in issue	5,601,812	5,601,687
Profit for the year attributable to the Group's owners (rounded to Tenge)	1,429	1,220

Carrying amount of one share

Pursuant to the resolution of the Exchange Council of Kazakhstan Stock Exchange JSC ("KASE") dated 4 October 2010, financial statements must contain data on the carrying amount of one share (ordinary and preferred) at the reporting date calculated in accordance with the rules approved by KASE. At 31 December 2020, this indicator calculated by the management of the Group based on the consolidated financial statements amounted to Tenge 86,937 (31 December 2019: Tenge 85,925). The table for calculating the carrying amount of one share is as follows:

<i>In thousands of Kazakhstani Tenge</i>	2020	2019
Total assets	885,705,149	889,217,254
Less: intangible assets	(3,570,398)	(3,691,945)
Less: total liabilities	(395,129,513)	(404,200,884)
Net assets for ordinary shares	487,005,238	481,324,425
Number of ordinary shares at 31 December	5,601,812	5,601,687
Carrying amount of one share, Tenge	86,937	85,925
